*Public Space and the Ideology of Place in American Culture* Miles Orvell, Jeffrey L. Meikle, 2009 We typically take public space for granted as if it has continuously been there yet public space has always been the expression of the will of some agency person or institution who names the space gives it purpose and monitors its existence And often its use has been contested These new essays written for this volume approach public space through several key questions Who has the right to define public space How do such places generate and sustain symbolic meaning Is public space unchanging or is it subject to our subjective perception Do we given the public nature of public space have the right to subvert it These eighteen essays including several case studies offer convincing evidence of a spatial turn in American studies They argue for a re visioning of American culture as a history of place making and the instantiation of meaning in structures boundaries and spatial configurations Chronologically the subjects range from Pierre L Enfant s initial majestic conceptualization of Washington D C to the post modern realization that public space in the U S is increasingly a matter of waste Topics range from parks to cities to small towns from open air museums to airports encompassing the commercial marketing of place as well as the subversion and re possession of public space by the disenfranchised Ultimately public space is variously imagined as the site of social and political contestation and of aesthetic change

promote How are they organized and what are their scales of political action and power relations Each chapter explores why and how people choose food as a means of forging social and economic justice covering diverse forms of food activism from individual acts by consumers or producers to organized social groups or movements The case studies embrace a wide geographical spectrum including Cuba Sri Lanka Egypt Mexico Italy Canada France Colombia Japan and the USA This is the first book to examine food activism in diverse local national and transnational settings making it essential reading for students and scholars in anthropology and other fields interested in food economy politics and social change     Urban Gardening as Politics Chiara Tornaghi, Chiara Certomà, 2018-07-11 While most of the existing literature on community gardens and urban agriculture share a tendency towards either an advocacy view or a rather dismissive approach on the grounds of the co optation of food growing self help and voluntarism to the neoliberal agenda this collection investigates and reflects on the complex and sometimes contradictory nature of these initiatives It questions to what extent they address social inequality and injustice and interrogates them as forms of political agency that contest transform and re signify the urban Claims for land access the right to food the social benefits of city greening community conviviality and insurgent forms of planning are multiplying within policy advocacy and academic literature and are becoming increasingly manifested through the practice of urban gardening These claims are symptomatic of the way issues of social reproduction intersect with the environment as well as the fact that urban planning and the production of space remains a crucial point of an ever evolving debate on equity and justice in the city Amid a mushrooming over positive literature this book explores the initiatives of urban gardening critically rather than apologetically The contributors acknowledge that these initiatives are happening within neoliberal environments which promote among other things urban competition the dismantling of the welfare state the erasure of public space and ongoing austerity These initiatives thus can either be manifestation of new forms of solidarity political agency and citizenship or new tools for enclosure inequality and exclusion In designing this book the progressive stance of these initiatives has therefore been taken as a research question rather than as an assumption The result is a collection of chapters that explore potentials and limitations of political gardening as a practice to envision and implement a more sustainable and just city     *Planting the Seed* Suzanne Winckler, 2002-01-01 Offers information on designing planting and tending an organic garden
