Framing the Islands Greg Fry,2019-10-25 Since its origins in late eighteenth century European thought the idea of placing a regional frame around the Pacific islands has never been just an exercise in geographical mapping This framing has always been a political exercise Contending regional projects and visions have been part of a political struggle concerning how Pacific islanders should live their lives Framing the Islands tells the story of this political struggle and its impact on the regional governance of key issues for the Pacific such as regional development resource management security cultural identity political agency climate change and nuclear involvement It tells this story in the context of a changing world order since the colonial period and of changing politics within the post colonial states of the Pacific Framing the Islands argues that Pacific regionalism has been politically significant for Pacific island states and societies It demonstrates the power associated with the regional arena as a valued site for the negotiation of global ideas and processes around development security and climate change It also demonstrates the political significance associated with the role of Pacific regionalism as a diplomatic bloc in global affairs and as a producer of powerful policy norms attached to funded programs This study also challenges the expectation that Pacific regionalism largely serves hegemonic powers and that small islands states have little diplomatic agency in these contests Pacific islanders have successfully promoted their own powerful normative framings of Oceania in the face of the attempted hegemonic impositions from outside the region seen for example in the strong commitment to the Blue Pacific continent framing as a guiding ideology for the policy work of the Pacific Islands Forum in the face of pressures to become part of Washington s Indo Pacific strategy     **Islands in the Salish Sea** Judi Stevenson,Sheila Harrington,2005 Gorgeous fascinating and unconventional the Islands in the Salish Sea show aspects of the Gulf Islands that are most beloved by the residents from heritage orchards fishing spots and patches of endangered wild orchids to ancient First Nations sites and bird colonies The community on each island decided what elements should be depicted and local artists then created each of the magnificent and wildly different maps This volume is a treasure trove of cherished information that could have been lost presented with imagination and great beauty The Islands in the Salish Sea Community Mapping Project was coordinated by Sheila Harrington and Judi Stevenson who live on Salt Spring Island     Transnational Memory Chiara De Cesari,Ann Rigney,2014-10-29 How do memories circulate transnationally and to what effect How to understand the enduring role of national memories and their simultaneous reconfiguration under globalization Challenging the methodological nationalism that has until recently dominated the study of memory and heritage this book charts the rich production of memory across and beyond national borders Arguing for the fruitfulness of a transnational as distinct from a global approach it places the issues of circulation articulation and the scales of remembrance at the centre of its inquiry In the process it sheds new light on the ways in which mediation post coloniality migration and regional integration affect both

the way we remember and the role of memory in contemporary societies In this interdisciplinary collection humanities and social science scholars examine a rich sample of cases from the nineteenth century on stretching across the globe from Vietnam to Europe and the Middle East to the USA and the Pacific and involving a wide range of cultural practices from quilting to films from photography to heritage sites and monuments In the process the volume develops a new theoretical framework while proposing new methodological tools and resources for studying collective remembrance beyond the nation state
