The Breeder's Exception to Patent Rights Viola Prifti, 2015-06-02 This book is the first to analyze the compliance of different types of a breeder's exception to patent rights with article 30 of the Agreement on Trade Related Aspects of Intellectual Property Rights This type of exception allows using protected biological matter for breeding new varieties of plants The breeder's exception is widely accepted under plant variety legislation but it is not common under patent laws despite the fact that patent rights often cover plant varieties Only few European countries have adopted such an exception After the entry into force of the Agreement on a Unified Patent Court the exception will be mandatory for all European Union Member states Based on a legal and economic approach this book offers guidance to those countries that need to incorporate a breeder's exception into their national patent systems and suggests the importance of the exception for promoting plant breeding activities

Biotechnology, Patents and Morality Sigrid Sterckx, 2017-11-01 This title was first published in 2000 This work

documents an international and interdisciplinary workshop on the ethical aspects of the patenting of biotechnological inventions including genes plants and animals The public perception is discussed along with how these perceptions relate to ethical social and cultural factors The legal framework in Europe is laid out by several experts in the field of patent law and the situation in the US is also briefly described This edition also includes a general discussion of three important theories called upon to justify the patent system the natural rights argument the distributive justice argument and the utilitarian argument The chapter about the European Directive on the legal protection of biotechnological inventions has been updated A selection of provisions from the August 1997 draft as well as the final text of the Directive as adopted on 12 May 1998 are discussed and commented upon The patent provisions of the TRIP s Agreement the Agreement on Trade Related aspects of Intellectual Property rights concluded in 1994 as an Annex to the Agreement Establishing the World Trade Organization are also discussed and criticized paying particular attention to the implications for biotechnology patents Finally the question is asked whether the developing countries stand to gain anything from TRIPs A look at the results of empirical research conducted by commentators on the economics of patenting reveals that the new patent regime may prove to entail significant costs for the developing countries This second edition also contains material on the EU Directive on biotechnology patents adopted in May 1998 justificatory theories of the patent system and the TRIP s agreement on Trade Related aspects of Intellectual Property rights concluded in the GATT WTO framework
