Intellectual Property Rights in China Zhenqing Zhang, 2019-02-22 Over the past three decades China has transformed itself from a stagnant inward centrally planned economy into an animated outward looking decentralized market economy Its rapid growth and trade surpluses have caused uneasiness in Western governments which perceive this growth to be a result of China's rejection of international protocols that protect intellectual property and its widespread theft and replication of Western technology and products China's major trading partners particularly the United States persistently criticize China for delivering at best half hearted enforcement of intellectual property rights IPR norms Despite these criticisms Zhenqing Zhang argues that China does respect international intellectual property rights but only in certain cases In Intellectual Property Rights in China Zhang addresses the variation in the effectiveness of China's IPR policy and explains the mechanisms for the uneven compliance with global IPR norms Covering the areas of patent copyright and trademark Zhang chronicles how Chinese IPR policy has evolved within the legacy of a planned economy and an immature market mechanism In this environment compliance with IPR norms is the result of balancing two factors the need for short term economic gains that depend on violating others IPR and the aspirations for long term sustained growth that requires respecting others IPR In case studies grounded in theoretical analysis as well as interviews and fieldwork Zhang demonstrates how advocates for IPR typically cutting edge Chinese companies and foreign IPR holders can be strong enough to persuade government officials to comply with IPR norms to achieve the country's long term economic development goals

Conversely he reveals the ways in which local governments protect IPR infringers because of their own political interests in raising tax revenues and creating jobs Global Knowledge Cultures ,2007-01-01 Knowledge is about cultural power Considering that it is both resource and product within the brave new world of fast capitalism this collection argues for knowledge cultures that are mutually engaged and hence more culturally inclusive and socially productive Globalized intellectual property regimes the privatization of information and their counterpoint the information and creative commons movements constitute productive sites for the exploration of epistemologies that talk with each other rather than at and past each other Global Knowledge Cultures provides a collection of accessible essays by some of the world s leading legal scholars new media analysts techno activists library professionals educators and philosophers Issues canvassed by the authors include the ownership of knowledge open content licensing knowledge policy the common wealth of learning transnational cultural governance and information futures Together they call for sustained intercultural dialogue for more ethical knowledge cultures within contexts of fast knowledge capitalism **Cultural Control and Globalization in Asia** Laikwan Pang,2007-05-07 This book challenges the prevailing view of cinema and cinema culture that Hollywood the US creates produces and exports with other countries importing sometimes modifying and sometimes pirating original American work
