Paterson And Zderad Humanistic Nursing Theory Series Notes On Nursing Theories:

Paterson and Zderad Nancy O'Connor, 1992-11-20 Nursing is placed within a humanistic framework in Paterson and Zderad's theory which defines nursing as a nurturing response aimed at well-being. Three constructs of nursing which describe the why and how of nursing practice are identified: comfort, clinical, and all at once. In this volume O'Connor explores the origin of the theory and its underlying assumptions. She also examines the major concepts of the metaparadigm of nursing including the nursing process.

Pioneering Theories in Nursing Austyn Snowden, Allan Donnell, Tim Duffy, 2014-09-03 Pioneering Theories in Nursing traces the origins of nursing theories through their founders. Unlike other nursing theory texts, this book provides the personal story on some of the greatest nursing leaders, clinicians, and theorists to date so the reader can understand the context within which the nursing pioneer developed their theory. It will attempt to explain the theories and practice of nursing and provide food for thought for students and practitioners, encouraging reflective thinking. Each section begins with an overview of the chapters and identifies common themes. Designed to be highly user-friendly, each chapter follows a standard structure with a short biography, a summary on their special interests, and an outline of their writings before each theory is examined in detail. The chapter then looks at instances of how this theory has been put into practice and what influence this process has had on the wider nursing community. Further links to other theorists are provided as well as key dates in the life of the theorists and a brief profile.

Psychiatric Mental Health Nursing Patricia G. O'Brien, Winifred Z. Kennedy, Karen A. Ballard, 2012-02-15 A comprehensive, easy-to-read introductory text for nursing students. The book is organized into three sections: Introduction to Psychiatric Mental Health Nursing, Mental Health Disorders, and Nursing Management of Special Populations. This unique text is the most comprehensive psychiatric mental health resource available.

Margaret Newman Joanne Marchione, 1992-12-15 Margaret Newman is one of the pre-eminent nursing theorists whose qualitative theories and methods have expanded the scientific base for the field. Her theory defines health as the unfolding or expanding of consciousness and nursing as an integrative force that focuses on the wholeness of the person. This volume offers a clear guide to applying theory to practice with individual, family, and community health. Marchione's work reflects several years of experimentation and application of Newman's theory.

Betty Neuman Karen S. Reed, 1993-10-20 Used extensively in nursing education, Betty Neuman's systems model reflects nursing's interest in holism and in the influence of environment on health. This volume opens with a brief biography of Betty Neuman and continues with a succinct discussion of her theory that outlines its origins, assumptions, and the major concepts of the metaparadigm of nursing. It continues with a presentation of the propositions of the conceptual model, examples for application to practice and research, classic works, critiques, and research, and a glossary of important terms. Ideally suited as a supplementary text, Betty Neuman is essential reading for the undergraduate nursing student as well as the more advanced student or nurse interested in a quick review.
