Power-Sharing in Iraq after 2003 Ibrahim Muhammad Aziz, 2021-02-15 After the collapse of Saddam's regime in 2003 the most important issue in Iraq was the power sharing arrangements among communities At this point the Iraqi people were presented with the chance to look for another political system which would retain all communities participation consociational democracy an ideal theme in that kind of system everybody has a voice and contributes to the political process Therefore the US led coalition forces were invested in working to form political order according to power sharing arrangements and recognized that they needed to do this by gathering Iraqi's politicians to reach an agreement about power sharing arrangements This book concentrates on connections or divergences between formal or informal examples of consociationalism and the actual practice of these between 2003 and 2014 in Iraq The author argues that consociational elements are partially reflected in the permanent constitution and partially implemented throughout the period under investigation bearing in mind the positive role of the US led coalition The Publishers' Circular and Booksellers' Record, 1928 China's Soft Power and Higher Education in South Asia Romi Jain, 2021-05-17 This empirical work illuminates how China uses the higher education mechanism in South Asia to advance its national interests and investigates the outcomes for China including both challenges and opportunities Using a soft power theoretical framework this book employs the case study of Nepal a South Asian country of profound geostrategic value for the two competing powers of China and India Illustrating how higher education is the mechanism for achieving soft power goals it draws on data analysis based on archival sources and interviews with China and South Asia experts including academics and politico bureaucratic elites as well as interviews with Nepalese students and alumni Importantly though this book advances an innovative conceptual model of

Chinese Investments and the Economic Security Turn in Europe Francesca Ghiretti, 2025-01-10

Focusing on inward foreign direct investment (FDI) screening this book provides an in-depth analysis of how European states' economic interactions with China have become a security issue. Based on 100 interviews with scholars, journalists, policy makers and politicians from across Europe, the book underscores the importance of the policy making process that led to the adoption of investment screening in European nations. It adopts the theory of securitization to analyse the passage of the status of Chinese FDI from economy to security. In doing so it shows how the shifting view of Europeans is attributed to changes such as China's growing economic presence, the persistence of non-market practices, the loss of competitiveness and the use of economic statecraft.

The EU's Transformative Power H. Grabbe, 2005-11-10

Between 1989 and 2004 the EU's conditionality for membership transformed Central and East Europe. The EU had enormous potential power over the whole range of domestic politics in the candidate countries. However, the EU was able to use that power at a few key points in the process leading to their accession. The EU's long-term influence worked primarily through soft power and through voluntary rather than coercive means. During the membership preparations, the EU built many different routes of influence into the candidate countries' domestic policy making through Europeanization. The Central and East Europeans voluntarily took on the Union's norms and methods guided by the European Commission in a massive transfer of policies and institutions. However, the EU missed important opportunities to effect change as well. The EU's Transformative Power explores in detail how the EU used its influence to control the movement of people across Europe through both coercive use of conditionality and voluntary methods of Europeanization.

The Palgrave Encyclopedia of Victorian Women's Writing Lesa Scholl,Emily Morris,2022-12-15 Since the late twentieth century there has been a strategic campaign to recover the impact of Victorian women writers in the field of English literature However with the increased understanding of the importance of interdisciplinarity in the twenty first century there is a need to extend this campaign beyond literary studies in order to recognise the role of women writers across the nineteenth century a time that was intrinsically interdisciplinary in approach to scholarly writing and public intellectual engagement

Russia as a Great Power Jakob Hedenskog,Vilhelm Konnander,Bertil Nygren,Ingmar Oldberg,Christer Pursiainen,2013-07-04 After a period of relative weakness and isolation during most of the 1990s Russia is again appearing as a major security player in world politics This book provides a comprehensive assessment of Russia s current security situation addressing such questions as What kind of player is Russia in the field of security What is the essence of its security policy What are the sources capabilities and priorities of its security policy What are the prospects for the future One important conclusion to emerge is that while Russian foreign policy under Putin has become more pragmatic and responsive to both problems and opportunities the growing lack of checks and balances in domestic politics makes political integration with the West difficult and gives the president great freedom in applying Russia s growing power abroad

Rebel Financing and Terrorism in Civil Wars Margherita Belgioioso,2023-08-17 This book investigates the ways in which the lethality of terrorist violence depends on how rebel organizations finance their rebellion The leaders of rebel groups make calculated decisions on the intensity of terrorism killings considering the benefits and costs of targeting non combatants against the financing needs of their organization The

study specifically focuses on analyzing the effects of different external financing options available to rebel groups and takes into account the role of local populations in making financing available This comparative approach to external financing reveals new hypotheses that are empirically verified and differ from the expectations and findings of prior research The book's findings are relevant to policy discussions on counter insurgency strategies that prioritize protecting populations from human rights abuses Existing doctrines tend to overlook the potential impact of targeted efforts to isolate insurgents from specific financing sources on the capacity to secure local populations This book will be of interest to students of civil wars terrorism studies political violence and security studies
