**Shifting Sands** Reuben Okorie,2019-12-10 Welcome to the uncanny world of obduracy and obstinacy and their attendant skirmishes that resulted in the collapse of a republic Once you start reading this book you will not drop it until the last page is turned Mazonia was a vast continent of many tribes with diverse languages and cultures It had everything that could make it prosperous such as temperate climate and rich mineral resources However those resources were not tapped instead the people were content with sustenance agriculture and local markets Luminia on the contrary was a developed continent seeking to grow her industrial base When the Luminians got to know of a continent called Mazonia that remained uncharted with untapped mineral resources the floodgate for scramble for her lands was flung open For the Luminians the desire to grab as much Mazonian lands as possible became a do or die all comers affair in which Mazonian lands were unconscionably shared and the ethnic nationalities dispersed and dismembered As a result those unfortunate natives found themselves belonging to different Luminian countries carrying different colonial baggage and subjected to burdensome alien practices and regulations overnight Megaterra an intensely obdurate and perfidious nation was one of the Luminian nations that vied for Mazonian lands and she grabbed the largest and the most lucrative chunk inhabited by three discordant big tribes each of them big enough to be a country of its own Megaterra conquered colonized and amalgamated the disagreeable tribes into one country without due diligence and named it Dimakanga after the mighty river that snaked through it Compounded by the colonizer s divide and rule policy the forced unholy alliance did not go down well with the people and the patchwork quilt began to give way Three grueling wars of self determination were fought which forced the Republic of Dimakanga to metamorphose into three distinct sovereign nations

That movement which has been growing since the 1980s transcends borders as well as longstanding views about the role of government in the economy While many trade agreement critics on the left say they want government policies to make markets more equitable they find themselves allied with activists on the right who want to reduce the role of government in the economy Aaronson highlights three hot button social issues food safety the environment and labor standards to illustrate how conflicts arise between trade and other types of regulation And finally she calls for a careful evaluation of the terms of trade from which an honest debate over regulating the global economy might emerge Ultimately this book links the history of trade policy to the history of social regulation It is a social political and economic history that will be of interest to policymakers and students of history economics political science government trade sociology and international affairs Susan Ariel Aaronson is Senior Fellow at the National Policy Institute and occasional commentator on National Public Radio s Morning Edition
