political objectives become concrete      *Encyclopedia of Ancient Natural Scientists* Paul T. Keyser, Georgia L. Irby-Massie, 2008-11-19 The *Encyclopedia of Ancient Natural Scientists* is the first comprehensive English language work to provide a survey of all ancient natural science from its beginnings through the end of Late Antiquity. A team of over 100 of the world's experts in the field have compiled this *Encyclopedia* including entries which are not mentioned in any other reference work, resulting in a unique and hugely ambitious resource which will prove indispensable for anyone seeking the details of the history of ancient science. Additional features include a Glossary, Gazetteer, and Time Line. The Glossary explains many Greek or Latin terms difficult to translate whilst the Gazetteer describes the many locales from which scientists came. The Time Line shows the rapid rise in the practice of science in the 5th century BCE and rapid decline after Hadrian due to the centralization of Roman power with consequent loss of a context within which science could flourish.

**The Routledge Companion to Strabo** Daniela Dueck, 2017-03-16 The *Routledge Companion to Strabo* explores the works of Strabo of Amasia c. 64 BCE – c. CE 24, a Greek author writing at the prime of Roman expansion and political empowerment. While his earlier historiographical composition is almost entirely lost, his major opus, the *Geography*, includes an encyclopaedic look at the entire world known at the time, numerous ethnographic, topographic, historical, mythological, botanical, and zoological details, and much more. This volume offers various insights to the literary and historical context of the man and his world. The *Companion* in twenty-eight chapters, written by an international group of scholars, examines several aspects of Strabo's personality, the political and scholarly environment in which he was active, his choices as an author, and his ideas of history and geography. This selection of ongoing Strabonian studies is an invaluable resource not just for students and scholars of Strabo himself but also for anyone interested in ancient geography and in the world of the early Roman Empire.

**Regions of Risk** Kenneth Hewitt, 2014-09-19 An introduction to hazards, human vulnerability, and disaster, paying particular attention to the more severe or novel risks and disasters that affect the general public. The book is split into two parts, the first of which gives an overview of the field of risk and disaster in terms of three perspectives: hazards perspective, vulnerability perspective, and the active perspective. The second part illustrates and develops these ideas in relation to some of the more severe dangers and disasters of the twentieth century, for example, earthquake risk, cities at risk, and the civil disasters of war.

*Geographical Imaginations* Indranil Acharya, Ujjwal Kumar Panda, 2022 The book is aimed at providing a short introduction to the divergent ways in which space and place evince themselves in literature. *Apollo's Eye* Denis Cosgrove, 2003-10-17 This award-winning science history explores our evolving image of the globe and how it has shifted our relationship to the world. In *Apollo's Eye*, geographer Denis Cosgrove examines the historical

implications for the West of conceiving and representing the earth as a globe a unified spherical body Cosgrove traces how ideas of globalism and globalization have shifted historically in relation to changing images of the earth from antiquity to the Space Age He connects the evolving image of a unified globe to politically powerful conceptions of human unity Winner of the Association of American Publishers Professional and Scholarly Publishing Award in Geography Earth Sciences Annual Report of the Schools of New Brunswick ... by the Chief Superintendent of Education New Brunswick.
