The Ecology of Finnegans Wake Alison Lacivita, 2021-11-09 In this book one of the first ecocritical explorations of Irish literature Alison Lacivita defies the popular view of James Joyce as a thoroughly urban writer by bringing to light his consistent engagement with nature Using genetic criticism to investigate Joyce's source texts notebooks and proofs Lacivita shows how Joyce developed ecological themes in *Finnegans Wake* over successive drafts Making apparent a love of growing things and a lively connection with the natural world across his texts Lacivita's approach reveals Joyce's keen attention to the Irish landscape meteorology urban planning Dublin's ecology the exploitation of nature and fertility and reproduction Alison Lacivita unearths a vital quality of Joyce's work that has largely gone undetected decisively aligning ecocriticism with both modernism and Irish studies

Thomas Berry Mary Evelyn Tucker, John Grim, Andrew Angyal, 2019-06-04 Thomas Berry 1914-2009 was one of the twentieth century's most prescient and profound thinkers As a cultural historian he sought a broader perspective on humanity's relationship to the earth in order to respond to the ecological and social challenges of our times This first biography of Berry illuminates his remarkable vision and its continuing relevance for achieving transformative social change and environmental renewal Berry began his studies in Western history and religions and then expanded to include Asian and indigenous religions which he taught at Fordham University Barnard College and Columbia University Drawing on his explorations of history he came to see the evolutionary process as a story that could help restore the continuity of humans with the natural world Berry urged humans to recognize their place on a planet with complex ecosystems in a vast evolving universe He sought to replace the modern alienation from nature with a sense of intimacy and responsibility Berry called for new forms of ecological education law and spirituality as well as the creation of resilient agricultural systems bioregions and ecocities At a time of growing environmental crisis this biography shows the ongoing significance of Berry's conception of human interdependence with the earth as part of the unfolding journey of the universe

Embodied wisdom enters at times into unexpected and little explored pedagogical territories engaging with educational contexts that our dualistic culture often denigrates dismisses or considers taboo This work offers readers subtle understandings of the centrality of love desire and eros in teaching and learning carefully examines the connections between powerful family and school pedagogies including domestic violence against women and childhood sexual abuse opens up a textual space in which to contemplate the contemporary relevance of the ancient wisdom of Zen pedagogy and gives serious consideration to the role that the public pedagogies of popular culture play in the formation of personal and cultural identity The work of healing our dualistic educational culture is a significant political and ethical undertaking a matter of social justice Embodied wisdom is a book that lights the way for those who want to engage in meaningful cultural transformation It is above all a generative and hopeful text one that makes possible new kinds of conversations It will be of interest to curriculum theorists and teacher educators as well as those engaged in holistic education social ecology women s and gender studies and cultural studies This award winning ground breaking exploration of memoir as methodology is also an exquisitely written resource for those engaged in innovative arts based and autobiographical research *The Globalization of God* Dara Molloy, 2015-11-10 Roman Catholicism was the first multinational corporation Preaching was the forerunner of advertising Roman Catholicism created the template for the spread of commercial globalisation through multinational corporations For global Christianity to succeed all local expressions of Christianity had to be suppressed These included Celtic Christianity For 800 years the Roman church tried to break the independent spirit of Celtic Christianity Despite being defeated in 1014 at the Battle of Clontarf the Irish Vikings through their urban bishops were key actors in the imposition of Roman episcopal structures of church throughout Ireland in the 12th century There was an invasion of Norman monks to Ireland which began in 1142 twenty five years before the military invasion in 1167 The ecclesiastical colonisation of Ireland meant that a Roman episcopal and diocesan structure replaced the Celtic monastic structure Norman colonisers destroyed Celtic monasteries and replaced them with imported European religious orders Cistercian monasteries in Ireland were required to have French abbots and sometimes these were imposed by force no Irishman was allowed to become a bishop or attain any ecclesiastical high office St Malachy of Armagh betrayed his own Celtic heritage and was a key figure in bringing about the ecclesiastical colonisation of Ireland Monotheism is the mythical container for globalization Humans will fail to return to a sustainable way of living on this planet until the mythological container of monotheism is replaced by new bioregional spiritualities that go beyond both monotheism and polytheism *The Columbia Guide to American Environmental History* Carolyn Merchant, 2005-09-14 How and why have Americans living at particular times and places used and transformed their environment How have political systems dealt with conflicts over resources and conservation This is the only major reference work to explore all the major themes and debates of the burgeoning field of environmental history Humanity s relationship with the natural world is one of the oldest and newest topics in human history The issue emerged as a distinct field of

The Right of Nonuse Jan G. Laitos, 2013-05-21 The Right of Nonuse provides a fresh and remarkably different perspective on the real causes of the ills plaguing the world s resources and environment It re examines the very nature of nature and from this new perspective argues that what is needed is for humans to grant to natural resources a legal right to be left alone a right of nonuse In the process it explores the following questions Why do natural resources continue to be depleted and removed at an alarming rate Why are species

becoming extinct at a pace that may be unprecedented Why does the environment continue to be polluted Why do the weather and climate seem to be changing Perhaps most important why have laws legal institutions and governments been unable to address and correct these problems Jan Laitos reviews the history of our relationship with the natural environment and develops new ways of thinking about nature and its protection Instead of proceeding with human based goals Laitos argues that we should protect environmental resources for their own intrinsic value Instead of giving humans more and more rights to clean up the environment and to halt resources depletion a right of nonuse held by the resource itself should be created Natural resources have always possessed this parallel nonuse function and society should recognize and legitimize it

Healing the Soul after Religious Abuse Mikele Rauch,2009-03-20 Recent scandals of clergy sexual abuse have brought attention to the victims and their responses to and recovery from their abuse But few have considered the effect of the abuse on a victim s soul and religious outlook and beliefs *Healing the Soul after Religious Abuse* offers a unique perspective of recovery and restoration of the soul after religious abuse The author argues that religious abuse often stops not only psychological growth but also inward development The effect is not simply emotional because the devastation reaches to the core of the spirit Often there is no place for a God of love or a love of what once was divine Through a series of personal interviews with persons from the five major religions Rauch considers various ways that religion can do harm The stories told in this book include the road to restoration in the wake of institutional abuse and how inner experience is sometimes confused with religious training the sacred task of spiritual leadership and how to restore trust when there has been a violation an exploration of sacrifice and a clarification of the notion of shame a look at the impact of religious bigotry in the areas of race sexuality and tolerance an overview of sexuality and the place it holds in both celibate and family life the pernicious issue of clergy sexual abuse and the signs of spiritual trauma in response to such violation a roadmap for restoration and a challenge to religious institutions and lastly ways to reclaim the sacred and rewire the spirit Through interviews research and personal stories the author tells a story of recovery of the most delicate kind offering pathways through the dark night of religious violation to a restoration of the soul and its immense possibilities **Orthodox**

period of co optation beginning in the 1980s as a now popular social movement made a significant impact on public policy and witnessed the dilution of its goals Thiele largely focuses on the fourth and current wave of coevolution Coevolutionary thought and action is grounded in the interdependence of humans and nature in a global context With the goal of sustainable development in mind contemporary environmentalists argue that human livelihoods must be integrated into complex and evolving ecological systems This affirmation of coevolutionary interdependence has brought coherence to an inherently diverse social movement Through extensive interviews and a critical study of environmental publications and scholarly research the author provides an inside look at the environmental movement His analysis illuminates the social economic political and cultural forces that shape the environmental movement today and set its trajectory for the 21st century Anyone interested the future of environmentalism will find this book an invaluable guide *Exploring Wild Law* Peter Burdon,2011
