End of Antiquity James Howard-Johnston, 2024-10-28 The last longest and most damaging of the wars fought between East Rome and Sasanian Persia 603-628 brought the classical phase of west Eurasian history to a dramatic close. Despite its evident significance not least as the distant setting for Muhammad's prophetic mission, this last great war of antiquity attracted comparatively little scholarly attention until the last decades of the twentieth century. James Howard-Johnston's contributions to the subject, most of which were published in *Out of the Way Places*, one that on al-Tabari is printed for the first time, are brought together in convenient form in this volume. They strive to root history in close observation of landscape and monuments as well as careful analysis of texts. They explore the evolving balance of power between the two empires, look at events through Roman, Armenian and Arab eyes, and home in on the climax of the final conflict in the 620s. **Lost Railways of the World** Nigel Welbourn, 2023-02-16 Many readers will be familiar with Nigel Welbourn's long running series of books covering lost railways in Britain and Ireland. This new book *Lost Railways of the World* is the latest by this author on the subject of disused railways. The material for this volume has been collected and researched over a period of almost fifty years of world travel by the author. Informative text records the fortunes of the world's lost railways and every country with significant disused railways is included. Lost railways are a unifying theme being found throughout the world from the hottest African desert to the coldest steppes of Russia. The book has a surprisingly British flavor as historically many railways throughout the world used British equipment and operating practices. On his first trip in the 1970s the author discovered British signaling equipment in Europe. In 2020 he discovered the same firm's equipment in South America. The world's top ten lost lines are listed from the seven mile long sea bridge on a line that ran through the Florida Keys to the rugged mountain splendor of the Khyber Pass Railway. Some of the oldest, largest, longest, most northerly, southerly, expensive, crookedest, steepest, highest, lowest, and most notorious lost railways are included. Quirky and other unique tales from lost railways are included such as the disappearing phantom bridge, a line destroyed by molten lava, to one that sank under the sea, another that conveyed giant turtles to a memorial to a brave railway elephant. The author also visited remote areas of Argentina and provides more information on the mysterious disappearance of the ex-Lynton Barnstaple Railway locomotive *Lew A*. A large number of the 300 color illustrations have not been published before; maps and stories from around the world will delight not only the railway enthusiast but appeal to a wider cadre of readers with an interest in nostalgia, history, geography, and travel. To some, the book will be an informative source of information; to others, it is written in a way that highlights the most amazing lost railways in the world, but either way, it is a fascinating and unique book. **Restoration of Lost and Obliterated Corners** United States.
