(In)Security: Identifying the Invisible Disruptors of Security Gitanjali Adlakha-Hutcheon,Candyce Kelshall,2024-10-12
What does it take to disrupt security How does one disrupt the invisibility of insecurity How does one make the invisible factors that define and impact security visible For a start by giving voice to the unheard and the marginalized engaging non traditional understandings of security that might bring to light the cracks in our current security infrastructure and expose

the insecurities that are hidden in plain sight These voices include generational geographic cultural ethnic and gender based perspectives of insecurity which are ignored or simply cannot be heard by traditional notions of security Presently there is a lack of understanding of the language of nuanced hate being whispered from the ground that inform civil discord These call for new intrastate actions that need to be taken to make communities safer and building layers of protective resilience into the continuing existence of the state Unresolved grievances lay the foundation for insecurity and instability for the future at a time when states need cohesiveness more than ever and there are significant invisible insecurities external to the state that need to be revealed The tapestry of interrelationships that enable security within a state requires equity access and agency among communities If we are to achieve this we must learn to see the invisible listen to the unheard and move beyond our static conceptions of security In so doing we build more resilient societies in the face of a dynamic threat environment and ensure the peaceful continued existence of states This book is a sounding board for positive disruption a source for alternative theories tools and models to aid mitigation of the whispered threats and the soft violence which accompanies chauvinism of any one way of being In this edited book the multiplicity of factors that impact security is explored through new lenses to glean insights such that we are better equipped to prevent harm and protect our security
