international relations for the coming decades To what extent can the visions pushed forward by the leading powers of the world be reconciled to arrive at a shared direction for international order writ large The book s analysis also offers normative prescriptions on how to avoid a tragic race to the bottom a fragmented world of competing orders where states are unable to address shared global crises and challenges such as pandemics cross border crime climate tragedies and armed conflict With this it concludes by recognising the importance of agency as well as political imagination in navigating the crisis ridden ordering moment of the international system This book will be of key interest to scholars and students in global order studies and governance geopolitics regional studies foreign policy analysis as well as more broadly to international relations and security political history human geography and policymakers
