Identity from Early Childhood to Early Adulthood Ruth Wills,Marian de Souza,Jennifer Mata-McMahon,Mukhlis Abu

Bakar,Cornelia Roux,2021-07-15 How do children determine which identity becomes paramount as they grow into

adolescence and early adulthood Which identity results in patterns of behaviour as they develop To whom or to which group

do they feel a sense of belonging How might children adolescents and young adults negotiate the gap between their own

sense of identity and the values promoted by external influences The contributors explore the impact of globalization and

pluralism on the way most children and adolescents grow into early adulthood They look at the influences of media and

technology that can be felt within the living spaces of their homes competing with the religious and cultural influences of

family and community and consider the ways many children and adolescents have developed multiple and virtual identities

which help them to respond to different circumstances and contexts They discuss the ways that many children find

themselves in a perpetual state of shifting identities without ever being firmly grounded in one potentially leading to tension

and confusion particularly when there is conflict between one identity and another This can result in increased anxiety and

diminished self esteem This book explores how parents educators and social and health workers might have a raised

awareness of the issues generated by plural identities and the overpowering human need to belong so that they can address

associated issues and nurture a sense of wholeness in children and adolescents as they grow into early adulthood
