My Magic Pours Secret Libations:

My Magic Pours Secret Libations Monifa A. Love, 1996 This volume synthesizes the work of 16 women artists into an exceptional tour de force that confronts gender race and art in creative ways Together they explore their world through painting installation performance sculpture stained glass photography wearable art and ceramics The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

[Speculations on Black Life](#) Darrell Jones, Monifa Love, Anthony B. Pinn, 2023-05-18 Is God a white racist Posed by William R Jones in his ground breaking book of the same name this question disrupted the theological assumptions that marked Black religious thought from early writings of the 1800s to the formation of Black theology in the 1960s This book compiles his key and essential writings related to over three decades of critical reflection on race religion secularism and oppression in the United States Over the course of 30 years Jones pushed questions and considerations that refined Black theology and that gave greater shape to and understanding of Black philosophers intervention into issues of racial and structural inequality His philosophical work related to the grid of oppression fosters an approach to the nature and meaning of oppression in the United States encouraging rational interrogation of structures of injustice and thought patterns supporting those structures Still relevant today the straightforward style of communication used by Jones makes these essays
