Murray,2017-06 The economic imperative of sustainable tourism development frequently shapes life on small subtropical islands In Okinawa ecotourism promises to provide employment for a dwindling population of rural youth while preserving the natural environment and bolstering regional pride Footprints in Paradise explores the transformation in community and sense of place as Okinawans come to view themselves through the lens of the visiting tourist consumer and as their language landscapes and wildlife are reconstituted as treasured and vulnerable resources The rediscovery and revaluing of local ecological knowledge strengthens Okinawan or Uchinaa cultural heritage despite the controversial presence of US military bases amidst a hegemonic Japanese state *Kick-Start Your Class* LouAnne Johnson,2012-04-03 The New York Times bestseller author of Dangerous Minds has a new way to engage students LouAnne Johnson s newest book is a collection of fun and simple educational icebreaker activities that get students excited and engaged from the very first minute of class These activities are great to use with students at all levels and many of the activities include variations and modifications for different groups Research has shown that the use of icebreakers increases student motivation by creating an emotional connection between the student and school In as little as five minutes a creative icebreaker can engage students brains encourage critical thinking and much more Includes a fun filled collection of icebreakers that get students thinking and keeps them engaged Written by LouAnne Johnson a teacher and acclaimed author of eight books Contains ideas for promoting creativity unifying the classroom community preventing disruptive behavior and creating positive attitudes towards school and learning No matter what your students age group this book will give you the tools you need to create a classroom environment that promotes learning □ □□□□2019□9□□□□□□ □□□□□□,2019-09-01 36 1983 4 2019 72 73 30 43 An Exploration Into the Use of Stepwise Regression Analysis to Determine Post-consumer Recycled PET Content in PET Sheet Dongho Kang,2009 Peak Plastic Jack Buffington,2018-11-02 Shows why plastics in aggregate have become a toxin to humans wildlife and the planet and proposes novel solutions that involve neither traditional recycling nor giving up plastic Plastics In the 50 years since Dustin Hoffman s character in The Graduate was instructed that this was the career field of the future we have not been able to escape this ubiquitous but poorly understood material Author Jack Buffington argues that the plastics crisis is careening toward a tipping point from which there will be no return There is still time however to do something about this crisis if we have the imagination and the will to move away from the failed policies of the past This book is the first to propose a new model for linking our synthetic world to the natural one rather than seeking to treat them as separate entities The key is supply chain innovation Buffington presents five market based solutions based on this principle that will allow consumers to continue to use plastic which has in many ways enabled our way of life Alongside these proposed solutions he also addresses the proliferation of plastic as we know it growth that if left unchecked will lead to a planetary crisis according to the United Nations and considers how the material itself might be adapted for a sustainable future *The Business of Less* Roland

Geyer, 2021-09-06 The Business of Less rewrites the book on business and the environment For the last thirty years corporate sustainability was synonymous with the pursuit of eco efficiency and win win opportunities The notion of eco efficiency gives us the illusion that we can achieve environmental sustainability without having to question the pursuit of never ending economic growth The win win paradigm is meant to assure us that companies can be protectors of the environment whilst also being profit maximizers It is abundantly clear that the state of the natural environment has further degraded instead of improved This book introduces a new paradigm designed to finally reconcile business and the environment It is called net green which means that in these times of ecological overshoot businesses need to reduce total environmental impact and not just improve the eco efficiency of their products The book also introduces and explains the four pollution prevention principles again different less and labor not materials Together net green and the four pollution prevention principles provide a road map for businesses and for every household to a world in which human prosperity and a healthy environment are no longer at odds The Business of Less is full of anecdotes and examples This brings its material to life and makes the book not only very accessible but also hugely applicable for everyone who is worried about the fate of our planet and is looking for answers
