Reflection in Action Bairbre Redmond, 2017-03-02 Newly available in paperback this original and informative volume outlines a new well designed reflective teaching and learning model that can be used with single or multi disciplinary groups of students and professionals It offers an overview of the origins of the different theories of reflection and explains how different levels of reflection can be understood and incorporated into everyday teaching and training Outlining specific teaching and learning techniques to be used in training situations it also includes examples of how these techniques have been successfully used with groups of professionals from health and social care areas This edition features a substantive new preface bringing the book up to date with recent developments in the field It is a well researched guide to both the theory and the practice of reflection and it also offers those who teach and train professionals a clearly delineated reflective model for use in the classroom or professional training environment

Know Thyself Thomas O. Buford, 2011-11-25 Know Thyself An Essay in Social Personalism proposes that social Personalism can best provide for self knowledge In the West self knowledge has been sought within the framework of two dominant intellectual traditions order and the emerging self On the one hand ancient and medieval philosophers living in an orderly hierarchical society governed by honor and shame and bolstered by the metaphysics of being and rationalism believed persons gain self knowledge through uniting with the ground of their being once united they would understand what they are what they are to be and what they are to do On the other hand Renaissance and modern thinkers such as Pico della Mirandola Copernicus Descartes Locke and Kant shattered the great achievement of the high middle ages and bequeathed to posterity an emerging self in a splintered world Continuing their search for self knowledge the moderns found themselves faced with the dualism of the emerging self of the Renaissance and the natural world as understood by modern scientists New problems spun out of this dualism including the mind body problem the other minds problem free will and determinism the nature and possibility of social relationships values moral norms and their relationship to the natural and social worlds and the relationships between science and religion Finding self knowledge among these splinters without a guiding orientation has proven difficult Even though luminaries such as Spinoza Berkeley and Hegel attempted to bring order to the sundered elements their attempts proved unsatisfactory We contend that neither order nor the emerging self can adequately provide for self knowledge Since those culturally embodied master

narratives lead us to an impasse we turn to social Personalism Self knowledge developed in this book shows how persons in relation to the Personal learn who they are what they are to become and what they must do to achieve that goal It also shows that the achievement of self knowledge is supported by a natural social and cultural environment rooted in trust In this humane and timely discussion Thomas O Buford offers a personalist understanding of self knowledge that avoids the impersonalisms that erode the dignity of persons and their moral life which characterize modern life
