Tobbell, 2022-12-28 An analysis of the efforts of American nurses to establish nursing as an academic discipline and nurses as valued researchers in the decades after World War II Nurses represent the largest segment of the U S health care workforce and spend significantly more time with patients than any other member of the health care team Dr Nurse probes their history to examine major changes that have taken place in American health care in the second half of the twentieth century The book reveals how federal and state health and higher education policies shaped education within health professions after World War II Starting in the 1950s academic nurses sought to construct a science of nursing distinct from that of the related biomedical or behavioral sciences that would provide the basis for nursing practice Their efforts transformed nursing's labor into a valuable site of knowledge production and proved how the application of their knowledge was integral to improving patient outcomes Exploring the knowledge claims strategies and politics involved as academic nurses negotiated their roles and nursing's future Dr Nurse highlights how state supported health centers have profoundly shaped nursing education and health care delivery **Officer, Nurse, Woman** Kara Dixon Vuic, 2010-01-01 Winner 2010 Lavinia L Dock Award American Association for the History of Nursing An American Journal of Nursing Book of the Year in History and Public Policy I never got a chance to be a girl Kate O Hare Palmer lamented thirty four years after her tour as an army nurse in Vietnam Although proud of having served she felt that the war she never understood had robbed her of her innocence and forced her to grow up too quickly As depicted in a photograph taken late in her tour long hours in the operating room exhausted her both physically and mentally Her tired eyes and gaunt face reflected the weariness she felt after treating countless patients some dying some maimed all like her forever changed Still she learned to work harder and faster than she thought she could to trust her nursing skills and to live independently She developed a way to balance the dangers and benefits of being a woman in the army and in the war Only fourteen months long her tour in Vietnam profoundly affected her life and her beliefs Such vivid personal accounts abound in historian Kara Dixon Vuic's compelling look at the experiences of army nurses in the Vietnam War Drawing on more than 100 interviews Vuic allows the nurses to tell their own captivating stories from their reasons for joining the military to the physical and emotional demands of a horrific war and postwar debates about how to commemorate their service Vuic also explores the gender issues that arose when a male dominated army actively recruited and employed the services of 5 000 nurses in the midst of a growing feminist movement and a changing nursing profession Women drawn to the army's patriotic promise faced disturbing realities in the virtually all male hospitals of South Vietnam Men who joined the nurse corps ran headlong into the army's belief that women should nurse and men should fight Officer Nurse Woman brings to light the nearly forgotten contributions of brave nurses who risked their lives to bring medical care to soldiers during a terrible and divisive war Nursing Model Question Paper (Part 5) - 2024 Akash Tiwari, 2024-01-03
