Nursing Informatics for the Advanced Practice Nurse, Third Edition Susan McBride, Mari Tietze, 2022-02-01 Winner of two first place AJN Book of the Year Awards. This award-winning resource uniquely integrates national goals with nursing practice to achieve safe, efficient quality of care through technology management. The heavily revised third edition emphasizes the importance of federal policy in digitally transforming the U.S. healthcare delivery system, addressing its evolution and current policy initiatives to engage consumers and promote interoperability of the IT infrastructure nationwide. It focuses on ways to optimize the massive U.S. investment in HIT infrastructure and examines usability, innovative methods of workflow redesign, and challenges with electronic clinical quality measures (eCQMs). Additionally, the text stresses documentation challenges that relate to usability issues with EHRs and sub-par adoption and implementation. The third edition also explores data science, secondary data analysis, and advanced analytic methods in greater depth, along with new information on robotics, artificial intelligence, and ethical considerations. Contributors include a broad array of notable health professionals, which reinforces the book's focus on interprofessionalism. Woven throughout are the themes of point-of-care applications, data management, and analytics, with an emphasis on the interprofessional team. Additionally, the text fosters an understanding of compensation regulations and factors. New to the Third Edition: Examines current policy initiatives to engage consumers and promote nationwide interoperability of the IT infrastructure. Emphasizes usability, workflow redesign, and challenges with electronic clinical quality measures. Covers emerging challenge proposed by CMS to incorporate social determinants of health. Focuses on data science, secondary data analysis, citizen science, and advanced analytic methods. Revised chapter on robotics with up-to-date content relating to the impact on nursing practice. New information on artificial intelligence and ethical considerations. New case studies and exercises to reinforce learning and specifics for managing public health during and after a pandemic. COVID-19 pandemic-related lessons learned from data availability, data quality, and data use when trying to predict its impact on the health of communities. Analytics that focus on health inequity and how to address it. Expanded and more advanced coverage of interprofessional practice and education. IPE. Enhanced instructor package. Key Features: Presents national standards and healthcare initiatives as a guiding structure throughout. Advanced analytics is reflected in several chapters, such as cybersecurity, genomics, robotics, and specifically exemplify how artificial intelligence (AI) and machine learning (ML) support related professional practice. Addresses the new re-envisioned AACN essentials. Includes chapter objectives, case studies, and end

of chapter exercises and questions to reinforce understanding Aligned with QSEN graduate level competencies and the expanded TIGER Technology Informatics Guiding Education Reform competencies **The Future of Nursing** Institute of Medicine, Committee on the Robert Wood Johnson Foundation Initiative on the Future of Nursing, at the Institute of Medicine, 2011-02-08 The Future of Nursing explores how nurses roles responsibilities and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America s increasingly complex health system At more than 3 million in number nurses make up the single largest segment of the health care work force They also spend the greatest amount of time in delivering patient care as a profession Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act ACA enacted this year Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States To ensure its members are well prepared the profession should institute residency training for nurses increase the percentage of nurses who attain a bachelor s degree to 80 percent by 2020 and double the number who pursue doctorates Furthermore regulatory and institutional obstacles including limits on nurses scope of practice should be removed so that the health system can reap the full benefit of nurses training skills and knowledge in patient care In this book the Institute of Medicine makes recommendations for an action oriented blueprint for the future of nursing
