Nutrition And Diabetes:

Nutritional Management of Diabetes Mellitus Gary Frost, Anne Dornhorst, Robert Moses, 2003-08-29 Diabetes mellitus is a common disorder where the body is no longer able to regulate blood glucose levels correctly owing to defects in insulin secretion or action. While some people require treatment with insulin, many are able to control their diabetes through management of diet, e.g. by decreasing the fat intake and increasing the amount of fibre. This book provides an up-to-date review of the dietary management of diabetes, looking at general topics such as the metabolic principles of nutrition as well as more specific topics such as nutritional management of diabetic children, pregnant women and the elderly. A specialist text on the nutritional management of diabetes. A practical book useful in clinical practice. Written by well-respected clinicians within the field.

Handbook of Diabetes Medical Nutrition Therapy Margaret A. Powers (RD.), 1996 Provides dietitians and other health care professionals with the information they need to provide comprehensive diabetes care and self-management training. Topics covered include understanding diabetes pathophysiology, complications of diabetes, setting and achieving management goals, medical nutrition therapy, nutrition assessment, diabetes medications and delivery methods, exercise benefits and guidelines, comprehensive monitoring, blood glucose monitoring, preparing and evaluating diabetes education programs, counseling skills, selecting a nutrition approach, expanding meal planning approaches, the exchange system, carbohydrate counting, weight reduction, cultural considerations, macronutrient influence on blood glucose and health, complex and simple carbohydrates in diabetes therapy, identifying protein needs, lipid metabolism and choices, issues in prescribing calories, low-calorie sweeteners and fat replacers, fiber metabolism, making food choices, life stages, children and adolescents, pregnancy and diabetes, caring for older persons and nutrition and specific clinical conditions, renal disease, hypertension, eating disorders, surgery, gastrointestinal issues, dental care, HIV/AIDS etc.

Advanced Nutrition and Dietetics in Diabetes Louise Goff, Pamela Dyson, 2015-10-22 Published on behalf of The British Dietetic Association. *Advanced Nutrition and Dietetics in Diabetes* is an exploration of the evidence and practice of nutrition in diabetes, offering a global view of the lifestyle interventions for the prevention and management of diabetes, including management of complications and special population groups. With internationally recognised authors, this book applies the rigour of evidence-based medicine to important enduring topics in diabetes, such as public health efforts at diabetes prevention, formulating nutritional guidelines for diabetes, carbohydrates and the glycaemic index, the management of diabetes in older people. The authors draw on their research and practical experience to offer sound guidance on best practice, ensuring that interventions are both scientifically secure and effective.
