ABSTRACT

Introduction and aim. The popularity of the Mediterranean diet is increasing and following it has many health benefits, including improving mental well-being. The aim of the study was to assess the nutritional knowledge about the Mediterranean diet and its practical application among students in Poland.

Material and methods. The study assessed a group of 313 students in Poland. The research tool was a questionnaire that focused on knowledge about the Mediterranean diet.

Results. The study showed that in terms of knowledge of the Mediterranean diet, students scored on average 6.5 ± 3.2 points (on a scale 0–11). When it comes to dietary compliance, the average score was 6.3 ± 2.4 points (scale 1–13 points). The better the knowledge of the diet, the better the compliance with its rules. Statistically, the analysis showed that there is a significant relationship between the age and/or academic degree of the students and their higher level of knowledge. The greater compliance with Mediterranean eating patterns was influenced by the location, age, or education of the respondents.

Conclusion. The study shows that the surveyed group of students in Poland has only an average level of knowledge and compliance with the Mediterranean diet.

Keywords. Mediterranean diet, nutrition, students' knowledge

Introduction

Nowadays, there are many alternative ways of eating. One of them is the Mediterranean diet, which is often considered the healthiest model of nutrition in the world.¹ The Mediterranean diet is a typical way of eating people living in the Mediterranean. It is based mainly on products of plant origin, which provide large amounts of dietary fiber, antioxidants, vitamins, and minerals, which have a positive effect on health.² The Mediterranean diet has several nutritional recommendations. Olive oil should be consumed every day as the main source of fat in the diet. This fat contains monounsaturated fatty acids and antioxidants that sequester free radicals. The Mediterranean diet is based on eating two or more servings of vegetables, and fruits – one or two servings a

day. These low-calorie products contain vitamins, minerals and flavonoids that have antioxidant properties. Whole grain products rich in dietary fiber and B vitamins should be consumed every day. Fish and seafood should be eaten 2 or 3 times a week, as they contain omega-3 acids that help prevent many diseases, have anti-inflammatory properties, and affect overall improvement of health and well-being. Legume seeds are a source of vegetable protein and dietary fiber, so they should be eaten often. In this diet pattern, dairy products (milk, cheese, yoghurt) should be chosen low in fat. This group of foods is important because it provides calcium and phosphorus. Nuts and seeds are rich in vitamin E and omega-3 fatty acids essential for maintaining proper health. In the Mediterranean diet, it is also important
