Copper Transport and Its Disorders Arturo Leone, Julian F.B. Mercer, 2012-12-06 This book is a compilation of presentations at the first meeting devoted to the molecular and cellular biology of copper transport When we first considered the possible program for the meeting we felt that a forum to integrate the recent advances in molecular understanding of copper transport with the older knowledge of copper metabolism was needed In addition we wished to have a strong emphasis on the diseases of copper including the genetic diseases Menkes and Wilson and other possible health aspects of this metal seen from a molecular perspective Overall we were very happy with the success of the meeting and most participants were very enthusiastic Unfortunately we were not able to obtain manuscripts from every contributor but the selection in this book covers most of the topics discussed The history of biological research into copper dates from the latter half of the last century when the presence of copper as a component of living systems was first noted but it was not until the 1920s that the essential role of copper was first recognized I S McHargue found that plants and animals needed copper for optimal growth and health

and proposed that copper was needed for life McHargue 1925 Other groups soon confirmed these observations in plants In animals the requirement of copper for hematopoiesis was discovered in 1928 Hart et al

Breastfeeding Patricia Stuart-Macadam, 2017-09-29 Breastfeeding is a biocultural phenomenon not only is it a biological process but it is also a culturally determined behavior As such it has important implications for understanding the past present and future condition of our species In general scholars have emphasized either the biological or the cultural aspects of breastfeeding but not both As biological anthropologists the editors of this volume feel that an evolutionary approach combining both aspects is essential One of the goals of their book is to incorporate data from diverse fields to present a more holistic view of breastfeeding through the inclusion of research from a number of different disciplines including biological and social cultural anthropology nutrition and medicine The resulting book presenting the complexity of the issues surrounding very basic decisions about infant nutrition will fill a void in the existing literature on breastfeeding

Se *Military Strategies for Sustainment of Nutrition and Immune Function in the Field* Institute of

Medicine, Committee on Military Nutrition Research, 1999-06-13 Every aspect of immune function and host defense is dependent upon a proper supply and balance of nutrients Severe malnutrition can cause significant alteration in immune response but even subclinical deficits may be associated with an impaired immune response and an increased risk of infection Infectious diseases have accounted for more off duty days during major wars than combat wounds or nonbattle injuries Combined stressors may reduce the normal ability of soldiers to resist pathogens increase their susceptibility to biological warfare agents and reduce the effectiveness of vaccines intended to protect them There is also a concern with the inappropriate use of dietary supplements This book one of a series examines the impact of various types of stressors and the role of specific dietary nutrients in maintaining immune function of military personnel in the field It reviews the impact of compromised nutrition status on immune function the interaction of health exercise and stress both physical and psychological in immune function and the role of nutritional supplements and newer biotechnology methods reported to enhance immune function The first part of the book contains the committee s workshop summary and evaluation of ongoing research by Army scientists on immune status in special forces troops responses to the Army s questions conclusions and recommendations The rest of the book contains papers contributed by workshop speakers grouped under such broad topics as an introduction to what is known about immune function the assessment of immune function the effect of nutrition and the relation between the many and varied stresses encountered by military personnel and their effect on health

Micronutrient Deficiencies in the First Months of Life F. M. Delange, K. P. West Jr., Keith P. West, 2003-07 In many parts of the world deficiencies in vitamins minerals and trace elements during the early months of life have dramatic consequences on the health and development of infants and young children The nutritional status of the mother greatly influences breast milk micronutrient levels and hence the nutritional status of the infant This publication written by leading investigators and clinicians offers an up to date review of micronutrient requirements and the assessment of micronutrient status of mothers and young infants followed by the epidemiology and health consequences of micronutrient deficiencies It also includes different prophylactic and therapeutic approaches such as the most recent research on both single and multiple micronutrient interventions during pregnancy lactation and early infancy This publication will be of great assistance to pediatricians clinical investigators health workers and nutritionists engaged in the prevention and treatment of micronutrient deficiencies

Copper in Drinking Water National Research Council, Commission on Life Sciences, Board on Environmental Studies and Toxicology, Committee on Copper in Drinking Water, 2000-05-12 The safety of the nation s drinking water must be maintained to ensure the health of the public The U S Environmental Protection Agency EPA is responsible for regulating the levels of substances in the drinking water supply Copper can leach into drinking water from the pipes in the distribution system and the allowable levels are regulated by the EPA The regulation of copper however is complicated by the fact that it is both necessary to the normal functioning of the body and toxic to the body at too high a

level The National Research Council was requested to form a committee to review the scientific validity of the EPA's maximum contaminant level goal for copper in drinking water Copper in Drinking Water outlines the findings of the committee's review The book provides a review of the toxicity of copper as well as a discussion of the essential nature of this metal The risks posed by both short term and long term exposure to copper are characterized and the implications for public health are discussed This book is a valuable reference for individuals involved in the regulation of water supplies and individuals interested in issues surrounding this metal

Iron The British Nutrition Foundation, 2012-12-06 Iron is a key element in nutrition It has a central role in energy metabolism of living cells and iron deficiency anaemia is one of the world's most common nutritional deficiency diseases The Iron Task Force is a committee of acknowledged experts in the field of iron biochemistry and metabolism The members were invited by the British Nutrition Foundation to review the current state of knowledge of the nutritional and physiological significance of this most important element Iron Nutritional and physiological significance is a thorough review of the subject by experts

Progress in Iron Research Chaim Hershko, Abraham M. Konijn, Philip Aisen, 2012-12-06 The 4th International Conference on Hemochromatosis and the 11th International Conference on Iron and Iron Proteins took place in Jerusalem on April 27-30 and on May 2-7 1993 respectively The first a clinical meeting and the second a forum designed primarily for basic scientists Both meetings are held regularly on alternate years and represent probably the most important forum for the exchange of information in iron research The present volume Progress in Iron Research is based on a selection of presentations delivered at these meetings However this volume represents much more than a publication of conference proceedings It offers a comprehensive state of the art review on most aspects of iron metabolism We have tried to offer a balanced review of the most important recent developments in iron research including both basic research and clinical investigation However the scope of chapters was based by definition

on the actual participants at the meetings and some important fields in iron research such as plant physiology microbial aspects of iron metabolism and free radical research have not been dealt with Many of the authors of the 40 chapters have been personally responsible for some of the most important developments in iron research and insights into iron physiology and pathophysiology The Editors wish to express their gratitude for the outstanding and timely cooperation of all contributors to this volume
