Frontiers in International Environmental Law: Oceans and Climate Challenges Richard Barnes, Ronán Long, 2021-03-15 *Frontiers in International Environmental Law* explores how law and legal scholarship has responded to some of the most important oceans and climate governance challenges of our time Using the concept of the frontier each contributor provides a unique perspective on the way that we can understand and can shape the development of law and legal institutions to better protect our marine environment and climate system and reduce conflicts in areas of legal uncertainty The authors show how different actors influence legal development and how legal transitions occur in marine spaces and how change influences existing legal regimes They also consider how change creates risks for the protection of vulnerable environment but also opportunities for creative thinking and better ways of governing our environment *The Handbook of Global Communication and Media Ethics* Robert S. Fortner, P. Mark Fackler, 2011-03-21 This groundbreaking handbook provides a comprehensive picture of the ethical dimensions of communication in a global setting Both theoretical and practical this important volume will raise the ethical bar for both scholars and practitioners in the world of global communication and media Selected by Choice as an Outstanding Academic Title for 2011 Brings together leading international scholars to consider ethical issues raised by globalization the practice of journalism popular culture and media activities Examines important themes in communication ethics including feminism ideology social responsibility reporting metanarratives blasphemy development and globalism among many others Contains case studies on reporting censorship responsibility terrorism disenfranchisement and guilt throughout many countries and regions worldwide Contributions by Islamic scholars discuss various facets of that religion's engagement with the public sphere and others who deal with some of the religious and cultural factors that bedevil efforts to understand our world

Towards a "second Generation" in Environmental Laws in the Asian and Pacific Region Lin Heng Lye, Maria Socorro Z. Manguiat, 2003 Laws in the twentieth century were based on economic growth and development This new century calls for the reassessment of all laws from an environmental perspective in consideration of such looming

environmental concerns as global warming degradation of biodiversity and pollution This book captures some provoking thoughts raised during a symposium on second generation environmental laws held in Japan in 2002 The wide range of articles will promote greater understanding of what has been achieved with the first generation of environmental laws what is needed for the second generation and how to bridge the two

Empire and Revolution John Mason Hart,2006-01-10 This is an extraordinarily important history of both U S Mexico relations and of the political economic social and cultural activities of Americans in Mexico Friedrich Katz author of The Life and Times of Pancho Villa Empire and Revolution is empowering as well as informative providing a detailed record and judicious interpretation of the protean relations between the United States and Mexico As John Mason Hart convincingly narrates the association is of dynamic importance for people of both countries While there have been studies on discrete parts and periods of the U S Mexico relation this book charts and anchors the relation globally Hart allows the reader intellectual as well as imaginative insight into the multifaceted social cultural and political reality of the sharing of North America then now and in the future Juan Gomez Quinones author of Mexican American Labor 1790 1990

Cultural Sustainability and Arts Education Benjamin Jörissen,Lisa Unterberg,Tanja Klepacki,2023-01-01 This book is based on the topics questions and results of the international conference Aesthetics of Transformation Arts Education Research and the Challenge of Cultural Sustainability It aims to foster and sharpen the understanding of the potential role of arts education and arts education research for cultural

sustainability In an ever more complex and interconnected world culture is a valuable resource for sustainable development Based on the thesis that the change towards sustainability has to be a change that starts with cultural practices of perception and knowledge this book makes an important contribution to the broad discourse on cultural sustainability which has begun to emerge in recent years In this context the volume first deals with Intangible Cultural Heritage and how aesthetic practices and certain forms of art are changing through cultural transformation processes Subsequently it focuses on issues such as arts and cultural education in times of neoliberalism post migration and post coloniality as well as on arts and cultural education under conditions of digital transformation These theoretical and empirical contributions are complemented by insights into field trips to institutions and exemplary places of practice showing different representations of educational art practices cultural heritage and cultural sustainability Against this background the book finally offers responses and commentaries that can form the starting point for a far reaching interactive dialogical process on the utmost importance of cultural aesthetic and arts education as part of a global endeavor for sustainable development

Current Publications in Legal and Related Fields ,2000 Life Cycle Assessment of Energy Systems Nicholas Sakellariou,2018-05-04 This groundbreaking work is the most in depth and state of the art study on the Life Cycle Assessment LCA of energy systems the only volume available on this critical subject Energy and sustainability are two of the most important and often most misunderstood subjects in our world today As these two subjects have grown in importance over the last few decades interest in the Life Cycle Assessment LCA model has grown as well as a potentially crucial tool in understanding and striving towards sustainability in energy systems Not just wind and solar systems but all energy systems need to be understood through this model Wind and solar power have the potential to decentralize the U S energy system by offering local communities electricity and economic support depending on the scale and design of projects Nevertheless every energy technology potentially faces environmental costs lay and expert opposition and risks to public health Engineers play a central role as designers builders and operators in energy systems As they extend their expertise into electrical mechanical and chemical fields from fossil fuel based systems to renewable energy systems sustainability is steadily becoming one of the key criteria engineers apply in their work This groundbreaking new study argues that engineering cultures foster sustainability by adopting assumptions and problem solving practices as part of their identities when designing and building engineering projects This work examines the politics of creating utilizing and modifying Life Cycle Assessment LCA in the construction of renewable energy systems The only volume of its kind ever written it is a must have for any engineer scientist manager or other professional working in or interested in Life Cycle Assessment and its relation to energy systems and impact on environmental and economic sustainability
