## **Partnerships In Communities Reweaving The Fabric Of Rural America:**

Partnerships in Communities Jean Richardson, 2000 *Partnerships in Communities* provides a fresh perspective on sustainable rural community development offering community based and community driven responses to the challenges facing rural America. Author Jean Richardson draws on her many years of experience working in rural areas both at home and abroad to offer an integrated and practical approach to rural community development. Some of the findings presented are derived from a comprehensive project known as Environmental Partnerships in Communities EPIC which Richardson has directed for the past seven years in Vermont. From this experience and those of others from across America Richardson provides a wealth of insight regarding what works what doesn't and how financial and human resources can be most effectively focused in rural communities. Following an introductory chapter that describes what is happening in rural America today and examines the institutions and natural resource base upon which rural communities depend, the book addresses the need for self-directed community development, sets forth a comprehensive approach based on the EPIC experience, describes efforts to revitalize working rural landscapes including organization building, pasture management, historic preservation, and more. Uses case studies and personal stories of rural people to portray the critical role of leadership in community stewardship and conservation. At the end of each chapter the author synthesizes the transferable lessons learned and the book concludes with a chapter that draws together those lessons to suggest a dynamic new approach to rural development. Numerous photographs enliven the text and an extensive bibliography and a rich set of appendixes provide resources for additional information. *Partnerships in Communities* will serve as an invaluable source of inspiration and ideas for rural community leaders, citizen groups, public officials, planners, students of rural planning and community development, and nonprofit organizations involved with rural development.

**Remaking American Communities** David C. Soule, 2007-11-01 Urban sprawl has gained much national attention in recent years. Sprawl involves not only land use issues but also legal, political, and social concerns. It affects our schools, the environment, and race relations. Comprehensive enough for high school students and also appropriate for college undergraduates, *Remaking American Communities* delves into the challenges of urban sprawl by turning to some of America's top thinkers on the problem, including Robert Yaro, president of the Regional Plan Association. Other cutting edge essays include a foreword about the emergence of sprawl by nationally syndicated columnist Neal Peirce, views about race and class by former mayor of Albuquerque David Rusk, and a discussion of transportation dynamics by Curtis Johnson, president of the CitiStates Group. The essays in this collection explore the core issues of sprawl and the agenda for dealing with it. Complete with a glossary, resources, and contact information for smart growth alliances, this book is extremely user friendly. David C. Soule offers an unbiased viewpoint of this national phenomenon in a way that will be accessible to students and those with little background in the issue.

**Rural America** Caroline S. Kelsohn, 2002 Thomas Jefferson once envisioned the United States as a nation of yeoman farmers. Looking around today

however illustrates that nothing could be further from the truth In a globalised world and techno centred society urban sprawl is overtaking rural America For over a century farming was the backbone of the American economy and though it is still critical to American productivity many rural areas are plagued by poverty and job reduction Agricultural issues have a hold over national politics as in the debates over farm subsidies but they cannot change several significant trends in America today the movement toward fewer and larger farms environmental pressures from urban and suburban interests and changing food consumption patterns In order to assist the remaining yeomen farmers a comprehensive and integrated agricultural policy must be initiated to sustain the nation s farming communities This book analyses the status of the farm industry in rural America providing a historical context for agriculture and assessing its future for the nation and the information provided in this book is necessary to understanding the nature of what has historically been a key component of American industry and life
