Paso Local Frontiers At A Global Crossroads:

El Paso, 2004 **El Paso** Victor M. Ortíz-González, 2004 A grounded and instructive analysis of the ways globalization affects a border city Every marker of social difference can be easily interpreted in the fashionable language of borderlands and if so as Victor M Ortiz Gonzalez reveals the practical reality of the border region is often grossly misrepresented and its people woefully served He argues that amid the tantalizing abstractions generated by the sweeping reconfigurations of globalization people in cities like El Paso and Ciudad Juarez on the U S Mexican border are actually living the gritty realities of a new world order With descriptions of grassroots initiatives to confront the challenges and opportunities that NAFTA represents for the city El Paso challenges us to acknowledge and address the conceptual and sociopolitical tasks of a world in which abstract representations and nonlocal interests override concrete situations Ortiz Gonzalez also provides an indepth analysis of groups such as La Mujer Obrera Unite El Paso and the Hispanic Chamber of Commerce and their attempts to give local residents and workers more autonomy and power Balancing ethnographic detail with precise theoretical insights El Paso offers a compelling case study and a stirring call to understand both the conceptual challenge and the social urgency of the effects of globalization in local settings

Turkish Berlin Annika Marlen Hinze, 2013-08-01 The integration of immigrants into a larger society begins at the local

level Turkish Berlin reveals how integration has been experienced by second generation Turkish immigrant women in two neighborhoods in Berlin Germany While the neighborhoods are similar demographically the lived experience of the residents is surprisingly different Informed by first person interviews with both public officials and immigrants Annika Marlen Hinze makes clear that local integration policies often created by officials who have little or no contact with immigrants have significant effects on the assimilation of outsiders into a community and a society Focusing on the Turkish neighborhoods of Kreuzberg and Neukölln Hinze shows how a combination of local policy making and grassroots organizing have contributed to one neighborhood earning a reputation as a hip multicultural success story and the other as a rougher neighborhood featuring problem schools and high rates of unemployment Aided by her interviews she describes how policy makers draw from their imaginations of urban space immigrants and integration to develop policies that do not always take social realities into consideration She offers useful examples of how official policies can actually exacerbate the problems they are trying to help solve and demonstrates that a powerful history of grassroots organizing and resistance can have an equally strong impact on political outcomes Employing spatial theory as a tool for understanding the complex processes of integration Hinze asks two related questions How do immigrants perceive themselves and their experiences in a new culture And how are immigrants conceived of by politicians and policy makers Although her research highlights the German Turk experience in Berlin her answers have implications that resonate far beyond the city's limits

Struggling Giants Paul Kantor, Christian Lefèvre, Asato Saito, H. V. Savitch, Andy Thornley, 2012 The struggle for governability in the world's four leading global city regions

Gringolandia Matthew Hayes, 2018-11-13 A telling look at today's reverse migration of white middle class expats from north to south through the lens of one South American city Even as the migration crisis from the Global South to the Global North rages on another lower key and yet important migration has been gathering pace in recent years that of mostly white middle class people moving in the opposite direction Gringolandia is that rare book to consider this phenomenon in all its complexity Matthew Hayes focuses on North Americans relocating to Cuenca Ecuador the country's third largest city and a UNESCO World Heritage Site Many began relocating there after the 2008 economic crisis Most are self-professed economic refugees who sought offshore retirement affordable medical care and/or a lower cost location Others however sought adventure marked by relocation to an unfamiliar cultural environment and to experience personal growth through travel illustrative of contemporary cultures of aging These life projects are often motivated by a desire to escape economic and political conditions in North America Regardless of their individual motivations Hayes argues such North-South migrants remain embedded in unequal and unfair global social relations He explores the repercussions on the host country from rising prices for land and rent to the reproduction of colonial patterns of domination and subordination In Ecuador heritage preservation and tourism development reflect the interests and culture of European descendent landowning elites who have most to benefit from the new North-South migration In the process they participate in transnational gentrification that

marginalizes popular traditions and nonwhite mestizo and indigenous informal workers The contrast between the migration experiences of North Americans in Ecuador and those of Ecuadorians or others from such regions of the Global South in North America and Europe demonstrates that in fact what we face is not so much a global migration crisis but a crisis of global social justice

Security in the Bubble Christine Hentschel, 2015-08-08 Focusing on the South African city of Durban *Security in the Bubble* looks at spatialized security practices engaging with strategies and dilemmas of urban security governance in cities around the world While apartheid was spatial governance at its most brutal postapartheid South African cities have tried to reinvent space using it as a positive technique of governance Christine Hentschel traces the contours of two emerging urban regimes of governing security in contemporary Durban handsome space and instant space Handsome space is about aesthetic and affective communication as means to making places safe Instant space on the other hand addresses the crime related personal navigation systems employed by urban residents whenever they circulate through the city While handsome space embraces the powers of attraction instant space operates through the powers of fleeing In both regimes security is conceived not as a public good but as a situational experience that can no longer be reduced to the afterpains of racial apartheid this city's fragmentation is now better conceptualized according to Hentschel as a heterogeneous ensemble of bubbles of imagined safety

Hustle Urbanism Tatiana Thieme, 2025-03-25 Exploring hustle as a social cultural and economic phenomenon in contemporary Nairobi In Nairobi's underserved neighborhoods hustle has emerged as both a vital survival strategy and a way of life for youth Exploring the multiple meanings and manifestations of the hustle economy across different scenarios of provisioning distribution exchange learning and mobilizing *Hustle Urbanism* draws on more than a decade of ethnographic engagement to center the logics perspectives and inventive strategies of a group of youth who constantly navigate job scarcity inadequate basic services and climate induced harms Tatiana Thieme shows how young people develop tools of resistance against the legacies of colonial violence and uneven urban development while carving out spaces of opportunity for themselves and their peers The stories she includes bring thick ethnographic detail and longitudinal perspective to the lives and livelihoods of youth whose diverse skill sets and knowledges span from circular economies and eco activism to hip hop and local leadership Filling a significant gap in both existing scholarship and popular discussion *Hustle Urbanism* offers critical theorization of precarious urban environments and the affirmative modes of making life work in the city against the odds While Thieme cautions against fetishizing hustle as a form of social and economic uplift she calls for a greater recognition of the ingenuity and skill involved in hustle urbanism arguing that studying hustle narratives and practices opens up timely empirical and theoretical questions about overlapping urban struggles and possibilities that coexist in the everyday city

The Fragmented Politics of Urban Preservation Yue

Zhang,2013-08-01 While urban preservation is almost as old as cities themselves it has become increasingly controversial in modern cities In this book Yue Zhang presents a cross national comparative analysis of the politics of urban preservation Based on comprehensive archival research and more than two hundred in depth interviews in Beijing Chicago and Paris Zhang finds that urban preservation provides a tool for diverse political and social actors to frame their propositions and advance their favored courses of action In cities from West to East divergent political and economic interests have caused urban preservation to become contested Exploring three of the world s great cities Zhang deftly navigates readers through each case study illustrating the complexities of the politics of urban preservation in each city In Beijing urban preservation was integral to promoting economic growth and enhancing the city s image during the lead up to the 2008 Olympics in Chicago it is used to increase property values and revitalize neighborhoods and in Paris it offers a channel for national and municipal governments to compete for control over urban space Although urban preservation serves various purposes in these cities Zhang explains how different types of political fragmentation have affected the implementation of preservation

initiatives in predictable ways thus generating distinct patterns of urban preservation A comparative urban politics study of unusual breadth *The Fragmented Politics of Urban Preservation* gives us insight into the complex policy process of urban preservation through which political institutions are intertwined with interests and inclinations fundamentally shaping the direction of urban development the physical forms of cities and the lives of citizens *Renew Orleans?* Aaron

Schneider, 2018-03-27 Urban development after disaster the fading of black political clout and the onset of gentrification Like no other American city New Orleans since Hurricane Katrina offers powerful insight into issues of political economy in urban development and in particular how a city's character changes after a disaster that spurs economic and political transition In New Orleans the hurricane upset an existing stalemate among rival factions of economic and political elites and its aftermath facilitated the rise of a globally oriented faction of local capital In *Renew Orleans* Aaron Schneider shows how some city leaders were able to access fragmented local institutions and capture areas of public policy vital to their development agenda Through interviews and surveys with workers and advocates in construction restaurants shipyards and hotel and casino cleaning Schneider contrasts sectors prioritized during post Katrina recovery with neglected sectors The result is a fine grained view of the way labor markets are structured to the advantage of elites emphasizing how dual development produces wealth for the few while distributing poverty and exclusion to the many on the basis of race gender and ethnicity Schneider shows the way exploitation operates both in the workplace and the community tracing working class resistance that joins struggles for dignity at home and work In the process working classes and popular sectors put forth their own alternative forms of development *The Durable Slum* Liza Weinstein, 2014-04-01

In the center of Mumbai next to the city's newest and most expensive commercial developments lies one of Asia's largest slums where as many as one million squatters live in makeshift housing on one square mile of government land This is the notorious Dharavi district best known from the movie *Slumdog Millionaire* In recent years cities from Delhi to Rio de Janeiro have demolished similar slums at times violently evicting their residents to make way for development But Dharavi and its residents have endured for a century holding on to what is now some of Mumbai's most valuable land In *The Durable Slum* Liza Weinstein draws on a decade of work including more than a year of firsthand research in Dharavi to explain how despite innumerable threats the slum has persisted for so long achieving a precarious stability She describes how economic globalization and rapid urban development are pressuring Indian authorities to eradicate and redevelop Dharavi and how political conflict bureaucratic fragmentation and community resistance have kept the bulldozers at bay Today the latest ambitious plan for Dharavi's transformation has been stalled yet the threat of eviction remains and most residents and observers are simply waiting for the project to be revived or replaced by an even grander scheme Dharavi's remarkable story presents important lessons for a world in which most population growth happens in urban slums even as brutal removals increase From Nairobi's Kibera to Manila's Tondo megaslums may be more durable than they appear their residents retaining a fragile but hard won right to stay put **Mobile Urbanism**

Eugene McCann, Kevin Ward, 2011 How knowledge and power flow between places and impact cities worldwide *Global Governance* S. Rai, G. Waylen, 2008-02-27 This book provides the first comprehensive analysis of global governance from a gendered perspective It not only furthers the emerging feminist theorizing on global governance but also provides a theoretically informed and empirically based analysis of both institutions and transformative practices Border Politics Nancy A. Naples, Jennifer Bickham Mendez, 2015 In the current historical moment borders have taken on heightened material and symbolic significance shaping identities and the social and political landscape Borders defined broadly to include territorial dividing lines as well as sociocultural boundaries have become increasingly salient sites of struggle over social belonging and cultural and material resources How do contemporary activists navigate and challenge these borders What meanings do they ascribe to different social cultural and political boundaries and how do these meanings shape the strategies in which they engage Moreover how do these social movements confront internal borders based on the differences that emerge within social change initiatives Border Politics edited by Nancy A Naples and Jennifer Bickham Mendez explores these important questions through eleven carefully selected case studies situated in geographic contexts around the globe By conceptualizing struggles over identity social belonging and exclusion as extensions of border politics the authors capture the complex ways in which geographic cultural and symbolic dividing lines are blurred and transcended but also fortified and redrawn This volume notably places right wing and social justice initiatives in the same analytical frame to identify patterns that span the political spectrum Border Politics offers a lens through which to understand borders as sites of diverse struggles as well as the strategies and practices used by diverse social movements in today s globally interconnected world Contributors Phillip Ayoub Renata Blumberg Yvonne Braun Moon Charania Michael Dreiling Jennifer Johnson Jesse Klein Andrej Kurnik Sarah Maddison Duncan McDuie Ra Jennifer Bickham Mendez Nancy A Naples David Paternotte Maple Razsa Raphi Rechitsky Kyle Rogers Deana Rohlinger Cristina Sanidad Meera Sehgal Tara Stamm Michelle T llez *The Servant Class City* David J. Karjanen, 2016-07-15 San Diego California is frequently viewed as a model for American urban revitalization It looks like a success story with blight and poverty replaced by high rises and jobs But David J Karjanen shows that the much touted job opportunities for poor people have been concentrated in low paying service work as the cost of living in San Diego has soared The Servant Class City documents how over a period of three decades San Diego s urban transformation actually eroded the economic standing of the city s working poor Karjanen demonstrates that urban policy in San Diego which has been devoted to increasing tourism has fostered the creation of jobs that do not actually provide either livable wages or paths to upward mobility Marshaling a wealth of heretofore uncollected data he challenges the presumption that decades long stagnation of job mobility in the united states is a result of insufficient worker training or a skills mismatch or is attributable to various personal qualities of the urban poor Karjanen interweaves profiles of people with a compelling presentation of data Each chapter addresses a significant topic hospitality industry jobs retail work informal employment

fringe banking and economic barriers to mobility In revealing the true story of the poverty traps that are associated with low wage jobs in the service economy The Servant Class City complicates the rosy picture of life in an American tourist boomtown

Globalized Authoritarianism Koenraad Bogaert, 2018-03-20 A rich investigation into Morocco's urban politics Over the past thirty years Morocco's cities have transformed dramatically To take just one example Casablanca's medina is now obscured behind skyscrapers that are funded by global capital and encouraged by Morocco's monarchy which hopes to transform this city into a regional leader of finance and commerce Such changes have occurred throughout Morocco Megaprojects are redesigning the cityscapes of Rabat Tangiers and Casablanca turning the nation's urban centers into laboratories of capital accumulation political dominance and social control In Globalized Authoritarianism Koenraad Bogaert links more abstract questions of government globalization and neoliberalism with concrete changes in the city Bogaert goes deep beneath the surface of Morocco's urban prosperity to reveal how neoliberal government and the increased connectivity engendered by global capitalism transformed Morocco's leading urban spaces opening up new sites for capital accumulation creating enormous class divisions and enabling new innovations in state authoritarianism Analyzing these transformations he argues that economic globalization does not necessarily lead to increased democratization but to authoritarianism with a different face to a form of authoritarian government that becomes more and more a globalized affair Showing how Morocco's experiences have helped produce new forms of globalization Bogaert offers a bridge between in depth issues of Middle Eastern studies and broader questions of power class and capital as they continue to evolve in the twenty first century
