

Passing to a Human Victimhood

The Dynamics of
Creating Global Wealth

Foreword by Irving Finkel

Max Singer

Passage To A Human World The Dynamics Of Creating Global Wealth

B Lingard

Passage To A Human World The Dynamics Of Creating Global Wealth:

Passage to a Human World Max Singer, Argues that the dominant characteristic of the modern era is the world's passage from poverty to wealth Examines whether this economic growth is sustainable and looks at present concerns about degradation of the environment and the finite supplies of basic resources

The Economics of Population Julian L. Simon, Thomas Molnar's Bernanos is an illuminating study of the personal evolution of the French Catholic novelist Georges Bernanos from a reactionary royalist to a religiously principled anti fascist It also provides a detailed account of the intellectual divisions within the French Catholic Right and suggests a number of parallels with intellectual and literary figures on the secular and religious left including Zola Peguy and Simone Weil But as Molnar points out the significance of Bernanos is not exhausted by his writings Bernanos the man is as deserving of attention as is Bernanos the novelist essayist and social critic Molnar shows Bernanos against the troubled political religious background of modern France the Dreyfus case the disillusionment following World War I the Franco regime Vichy and the beginnings of the cold war Whatever touched France touched Bernanos and he flung himself into each crisis not armed with a political system nor an academically sanctioned philosophy but with a peasant's respect for what is and a Christian's sense of what might be The portrait that Molnar draws is that of a passionately concerned Christian who knows that truth is hard to come by but who is ready to follow it wherever it leads regardless of the consequences A crucial theme covered by Molnar is Bernanos long and conflicted relations with Charles Maurras and the Action Francaise He makes clear the extent to which Bernanos fervent Catholicism set him apart from Maurras whose positivistic inspiration and passion for order helped lay the groundwork for the political collapse that led to the Vichy regime Thomas Molnar's book is a fascinating account of Georges Bernanos stature as both a political thinker and an important novelist Bernanos will be enjoyed by historians political scientists philosophers theologians and scholars of literature

The History of the Future Max Singer, 2011-07-16 The History of the Future presents a set of ideas about where we are in history It focuses on the great majority of people in each society and shows that life in the modern world will be almost completely different from all previous human experience The present time is best understood as a period of transition during which one country after another is following along parallel paths from traditional to modern The process of becoming modern is so powerful that it will have similar effects on all countries Therefore one can predict the future of countries still undergoing this change by looking at the history of countries which have already completed their transition Singer asserts that a war system has long existed in which the central concern of nations has been to protect their security by military forces and alliances He makes the dramatic claim that because of the inherent nature of modern countries there will be no war system in any region populated solely by modern countries as illustrated by the current situation in Western Europe even though human character will not have improved However despite the fact that poverty tyranny and war will be largely eliminated the modern world may be worse for people than the traditional world because most

of the things that shaped human character will be obsolete

Environmental Resources A.S. Mather,K.

Chapman,2018-10-08 Environmental Resources provides a comprehensive text for undergraduate resource management courses It begins with an introduction to natural and environmental resources and then considers them in the context of politics time and space

The Myth of American Eclipse Alfred Balk,1990-01-01 In this title the respected public affairs journalist Alfred Balk refreshingly and authoritatively challenges the new orthodoxy Drawing on economic analyses and the perspective of thoughtful social researchers and government leaders abroad Balk presents a challengingly different thesis and one calculated to enliven current foreign and domestic policy debate

Space of Service to Humanity G.

Haskell,Michael J Rycroft,2013-03-11 G Haskell Symposium Convenor Vice President for Academic Services and Outreach International Space University By taking Space of Service to Humanity as the theme for the inaugural event in its series of annual symposia the International Space University ISU is asserting that this application of space technology requires special attention at this time Future symposia will examine the issues of the day from different perspectives In keeping with the fundamental principles of ISU the symposium took a global perspective as distinct from national or regional perspectives and treated both technical and non technical topics Oral and poster presentations were delivered in the scientific engineering economic legal political and philosophical domains All oral papers were delivered in plenary session to encourage cross fertilization between specialties and posters were readily available for viewing throughout the three day event As an international and interdisciplinary forum for the sharing of experience and for discussion and debate the symposium proved to be a stimulating and worthwhile event for the 135 participants from 25 countries and 5 international organizations with backgrounds in industry government and academia

Explorations in Environmental Political Theory Joel Jay

Kassiola,2015-03-04 The contributors to this volume focus on the political and value issues that in their shared view underlie the global environmental crisis facing us today They argue that only by transforming our dominant values social institutions and way of living can we avoid ecological disaster

From Marx to Mises David Ramsay Steele,2013-12-15 In 1920 Ludwig von Mises proclaimed that all attempts to establish socialism would come to grief for reasons of informational efficiency At first socialists and economists took Mises s argument seriously but by the end of the Second World War a consensus prevailed that Mises had been discredited More recently that consensus has been rapidly reversed it is now widely agreed that Mises was right Yet the momentous implications of the Mises argument for economics politics culture and philosophy remain largely unexplored From Marx to Mises is a clear penetrating exposition of the economic calculation debate and a scrutiny of some of the broader issues it raises

Prospects for Growth E. Calvin Beisner,2019-04-24 The warnings are loud and clear the world is dangerously overpopulated natural resources are becoming scarce catastrophic manmade global warming could lead to the death of our planet Are these accurate predictions we ignore at our own peril or are they politically motivated scare tactics designed to promote a radical agenda In this important book respected author E

Calvin Beisner brings biblical principles of theology anthropology and ethics to bear on these crucial questions What do the Scriptures say about population freedom civil government natural resources and management of the environment Is man meant to be servant master or steward of the earth This compelling study will help everyone concerned about the future of the earth make informed decisions on strategic issues of our day *Educating Beyond Violent Futures* Francis Hutchinson,2005-06-27 As we enter the Twenty First Century it is easy to assume that worsening trends in violence will be a feature of our lives whether in our schools our societies or as a species *Educating Beyond Violent Futures* challenges assumptions that trends in violence are destiny and raises crucial questions about choice and engagement Drawing upon new research this book is essential reading for those who want to prepare our children for living constructively in the next century *Radical Islam and International Security* Efraim Inbar,Hillel Frisch,2007-12-12 This book serves as a welcome addition to the intellectual and policy debate on the nature of the radical Islam phenomenon and how to respond to it The collection analyzes the phenomenon of radical Islam the challenges it poses to international security and the strategic responses available *An Examination of the Views of Religious Organizations Regarding Global Warming* United States. Congress. Senate. Committee on Environment and Public Works,2011 *Forthcoming Books* Rose Arny,1989-05 *Población vida y desarrollo* Amparo Vélez Ramírez,2008 AF Press Clips United States Department of State. Bureau of African Affairs,1988 **Commentary** ,1988 **Crosswinds** ,1992 **Foreign Affairs** , **Encounter** Stephen Spender,Irving Kristol,1989 *Global Resources* Matthew Polesetsky,1991 Sets out differing views on the nature and extent of depletion of the Earth s resources and whether development has caused environmental and population crises
