Main Currents in Modern Thought ,1975 *The Cosmotheandric Experience* Raimundo Panikkar,1998 The Cosmotheandric Experience is not a Christian or an Indic or a Buddhist study but an interdisciplinary study with a firm foundation It aims at an integration of the whole of reality We have to reconstruct the body of Prajapati even if some of the parts feel unworthy are shy or run away We have to think of all of the fragments of the present world in order to bring them together into a harmonious though not monolithic whole The Cosmotheandric principle which the author advocates could be formulated by saying that the divine the human and the earthly are three irreducible dimensions which constitute the real

The Encyclopedic Sourcebook of New Age Religions James R. Lewis,2004-08-30 In the late 1980s the New Age movement became the focus of both media attention and widespread ridicule as some of the more outlandish aspects of the movement such as channeling and the use of crystals for healing briefly piqued the public s curiosity While the movement was at its height scholars of religion generally sneered at what was perceived to be a daffy shallow craze and ignored it as a subject of serious study Professor James R Lewis was among the first to examine this growing religious phenomenon scientifically In previous books he has investigated the New Age as the most visible manifestation of a significant spiritual subculture the roots of which reach back to Theosophy Spiritualism and New Thought The present collection pursues this theme bringing together some of the best recent scholarship on new religions Since the height of its popular influence the New Age has declined in strength but has given rise to a plethora of new denominations all shaped by New Age ideas and spirituality Reflecting the emergence of this new denominational structure the core chapters of this book focus on specific groups Other chapters examine the movement s

Doris Lessing and Sufi Equilibrium S. Fahim,1994-07-12 The purpose of this study is to examine the rationale of Doris Lessing s development from Classical Realism to mysticism and forms of science fiction and to consider the unifying motifs that appear throughout her novels in her consistent search for Sufi Equilibrium The four novels selected in this study represent significant stages in Lessing s work Chapter one focuses on The Grass is Singing which represents the author s early traditionally realistic writing to show how far the preoccupations of Lessing s later novels find expression in this early work Chapter two studies The Golden Notebook which marks a turning point in formal structure in Lessing s canon and is selected as evidence of her interest in Sufism at that early stage Chapter three concentrates on the study of The Memoirs of a Survivor which has elicited a comparatively limited amount of criticism but which proves to be a major achievement when brought into line with Sufi methods of writing Chapter four considers Lessing s science fiction series Canopus in Argos tracing sources from Oriental literature a key which unlocks many areas of obscurity **The Only Tradition** William W.

Wohlwill,2013-11-11

This is the first in a series of volumes concerned with research encompassed by the rather broad term environment and behavior The goal of the series is to begin the process of integration of knowledge on environmental and behavioral topics so that researchers and professionals can have material from diverse sources accessible in a single publication The field of environment and behavior is broad and interdisciplinary with researchers drawn from a variety of traditional disciplines such as psychology sociology anthropology geography and other social and behavioral sciences and from the biological and life sciences of medicine psychiatry biology and ethology The interdisciplinary quality of the field is also reflected in the

extensive involvement of environmental professionals from architecture urban planning landscape architecture interior design and other fields such as recreation and natural resources to name just a few At present the field has a somewhat chaotic flavor with research being carried out by a variety of scholars who publish in a multitude of outlets Many researchers and practitioners are unaware of the state of knowledge regarding a specific topic because of the unavailability of integrated reference materials There are only a handful of books dealing with environment and behavior most of them unintegrated collections of readings with only an occasional systematic analysis of some facet of the field **Handbook of New Age**
