WHAT IS TIME? WHAT IS THE ORIGIN OF TIME AND THE SENSE OF DURATION? Samuel K. K. Blankson, 2017-03-31
The cosmos itself is not governed or regulated by time but by chance so cosmology can never appear consistently logical
Time and regulation are human concepts The points and instants notion is no longer credible Points are our basic intellectual tools since the instants arise through moving from point to point making time discrete A N Whitehead's definition of time as a sequence of non interacting moments is credible Russell also said There is no longer a universal time And Professor Eddington observed that time does not flow The Minkowski 4 D geometry is seen as plainly false and so time travel is impossible There are no days in nature at all There is only one constant day All existence is daylight The nights are freakish and irrelevant The earth's rotations are just flippant shadows over reality Nothing in astronomy happens only by night and not by day Logically deduced time appears to be human and we can solve the problem of how it passes by too *Time and Temporality in Organisations* Kätlin Pulk, 2022-02-14 This book presents an overview of different approaches to and understandings of time and temporality in organization studies It explores the development of time and temporality studies within organisation studies and examines its interdisciplinarity and roots in philosophy From there it moves to discuss more recent concerns in the field including the agency of time and temporal agency of human actors the temporal orientation of activities temporal trajectories sustainability and an events based view of time It will be useful reading for academics of organisational studies and the philosophy of business *Passing Time* W.D. Ehrhart, 2022-11-09 From 1969 to 1974 Ehrhart was just passing time His reentry into the world began with his enrollment as a 21 year old freshman and token Vietnam vet at Swarthmore College At first simply trying to bury his past Ehrhart slowly came to understand what happened to him and why in Vietnam Interspersed are flashbacks to the war itself It is the story of political and personal awakening As the war dragged on the United States deceitful involvement and its perpetuation of fallacies and lies about the war's conduct forced Ehrhart to confront his own feelings about his government country and self Throughout the reader shares with Ehrhart his odyssey through naivete growing awareness angry withdrawal and finally a measure of peace **The Tenth Man** Wei Wu Wei, 2003-08-11 An essential work of this enigmatic sage draws from the ancient traditions of Buddhism Taoism and Advaita Vedanta **The Dark Physics of The Universe** Burtay Mutlu, 2019-05-05 This book uses the knowledge of physics to interpret the events and facts in the Universe from a completely different perspective as philosophically In a way this is a philosophy for physic with a different Universe model proposal It proposes some answers for the mechanism of motion in the perspective of Speed momentum relativistic mass mass existence inertia time dilation length contraction by using Waveform Time due to expansion of the Universe In this view you can see the mechanism of time dilation and length contraction in the quantum level under constant speed and acceleration The book also suggests some explanations for The Time The Dimension the 4th and 5th dimensions The Anti Matter The Spin The Bonds The Chaotic Systems And the Book gives some answers in

Bergson's Philosophy of Self-Overcoming Messay Kebede, 2019-04-16 This book proposes a new reading of Bergsonism based on the admission that time conceived as duration stretches instead of passes This swelling time is full and so excludes the negative Yet swelling requires some resistance but such that it is more of a stimulant than a contrariety The notion of *lan vital* fulfills this requirement it states the immanence of life to matter thereby deriving the swelling from an internal effort and allowing its conceptualization as self overcoming With self overcoming as the inner dynamics of reality Bergson dismisses all forms of dualism and reductionist monism because both the absence of negativity and the swelling nature of time posit a creative process yielding a qualitatively diverse world This graded oneness is how the lower level activates intensification by turning into limitation making possible higher levels of achievement in particular through the union of mind and body and the integration of openness and closed sociability
