Ontohackers: Radical Movement Philosophy in the Age of Extinctions and Algorithms, Part II Jaym*/Jaime del Val, 2025-05-27

Ontohackers redefines what movement worlds and bodies are through the sense of proprioception reconceptualized as formless fluctuation field a movement matrix that is itself also thought and which underlies all life forms and fields including the inorganic Our worlds are made of endless such entangled fields n folding in neverending variation or enference The current planetary crisis has emerged due to an accidental evolutionary alignment narrowing and impoverishment of that matrix s indeterminacy that appeared gradually and eventually with bipedalism and which created an imbalance between the larger proprioceptive field and its brain and made the atrophied body extend itself technically in geometric fields gradually covering the planet along with its fears with disastrous consequences that are unleashing an unprecedented type of mass extinction and species suicide The reply to this crisis which is urgently due if we are to reduce even slightly the collapse coming up over the next decades is in recovering a lost sensorimotor plasticity which is also cognitive affective and relational plasticity through developing movement techne for cultivating Body Intelligence BI reversing and taking elsewhere the failed evolution culminating in AI stepping down from humanist supremacist pedestals undoing our dependency upon unsustainable killing machines of sedentary consumerism that impoverish experience stopping the reproduction of a species that has become plague by reversing heteronormative reproductive dogmas till we reach preagricultural population levels and recovering the joys of moving with the world in symbiotic mutation towards unprecedented evolutionary variations this is our cosmic responsibility for all life on Earth The book s structure expresses Enference Theory with regard to how processes of becoming have a triple movement an incipency unfolding the field Part I a condensation expansion where the field acquires full consistency Part II and a resonance or memory of the field relating to other fields Part III Part II subtitled R evolution

Technologies includes Books 4 5 and 6 and is by far the longest volume elaborating in depth the book's proposals in a triple movement. It first exposes the technologies of variation in nature Book 4 followed by the technologies of reduction in the Algoricene Book 5 and finally the possibilities for overcoming the reductive fold Book 6. Book 4 proposes a swarming chaomology as theory of orgiastic evolution culminating in the concept of metabiosis, life as indeterminate symbiotic mutation. Book 5 diagnoses the regimes that have formatted movement and presents the theory of the Algoricene or Age of Extinctions and Algorithms. It exposes a kinetic ontology, genealogy and dynamics of power. An interlude discusses post trans and metahumanism and a second part of the book unfolds a radical critique of the Planetary Holocaust. Book 6 unfolds metaformance, aesthetics and metahuman politics including the theory of metaformativity, the ontohacking pragmatics and a choral Dionysian ontology where the author also discusses at length his own techniques and art projects involving a radical challenge to human supremacism to face the extinction challenge now threatening all life on Earth toward an Earth liberation and regeneration.

Lutheran Identity and Political Theology Carl-Henric Grenholm, Göran Gunner, 2014-11-04. Lutheran tradition has in various ways influenced attitudes to work, the economy, the state, education and health care. One reason that Lutheran theology has been interpreted in various ways is that it is always influenced by surrounding social and cultural contexts. In a society where the church has lost a great deal of its cultural impact and authority and where there is a plurality of religious convictions, the question of Lutheran identity has never been more urgent. However, this question is also raised in the Global South where Lutheran churches need to find their identity in a relationship with several other religions. Here, this relationship is developed from a minority perspective. Is it possible to develop a Lutheran political theology that gives adequate contributions to issues concerning social and economic justice? What is the role of women in church and society around the world? Is it possible to interpret Lutheran theology in such a way that it includes liberating perspectives? These are some of the questions and issues discussed in this book.

What is Essential to Being Human? Margaret S. Archer, Andrea M. Maccarini, 2021-07-14 This book asks whether there exists an essence exclusive to human beings despite their continuous enhancement a nature that can serve to distinguish humans from artificially intelligent robots now and in the foreseeable future Considering what might qualify as such an essence this volume demonstrates that the abstract question of essentialism underpins a range of social issues that are too often considered in isolation and usually justify robophobia rather than roboophilia in terms of morality social relations and legal rights Any defence of human exceptionalism requires clarity about what property lies ground it and an explanation of why these cannot be envisaged as being acquired eventually by AI robots As such an examination of the conceptual clarity of human essentialism and the role it plays in our thinking about dignity citizenship civil rights and moral worth is undertaken in this volume What is Essential to Being Human will appeal to scholars of social theory and philosophy with interests in human nature ethics and artificial intelligence
