Worrell,Tammy L. Hughes,Dante D. Dixon,2020-09-17 Practice books are often simple how to lists or straightforward recipes and the practitioner still does not know why the activity is related to the outcome they seek In essence they lose how the specifics of the practice are related to the theory of change or the theory of how the problem developed in the first place This leads to practitioners potentially removing crucial elements of best practice procedures when making modifications to tackle new or different problems in an unfamiliar context By understanding the theoretical underpinnings practitioners can better plan for adjustments because they know how the outcomes they seek are informed by the theory Engagingly written and perfect for day to day use this book translates state of the art research and interdisciplinary theory into practical recommendations for those working with children and adolescents Creating a Teacher Collective Maria Impedovo,Karen Ferreira-Meyers,Noriyuki Inoue,2023-06-05 The present book addresses the following challenge How do we create and sustain a teacher community For practitioners the main question in this handbook is How do we build and facilitate teacher communities The different chapters discuss teacher interaction for learning and professional development in light of three constructs the group the community and the network There is a wealth of literature especially on theoretical frameworks success factors and barriers to participation in teacher communities However this book addresses the need for a step by step guide with valuable suggestions for those who want to create from scratch and support a community of teachers brought together to deal with specific issues and importantly mediated by educational technology
