one thing women should not have to bear was unwanted children and Marie Stopes devoted her life to lecturing instructing women and their husbands establishing birth control clinics attacking the religious social and political institutions that denied women's rights and winning the support of liberal thinkers and spokesmen among whom were George Bernard Shaw H G Wells and Arnold Bennett In contrast to her coolly brilliant scientific writings and the relentless logic displayed in her books about sex and marriage Marie Stopes was driven in her middle years to express publicly her own personal and sexual disappointments in excessively romantic sometimes erotic verse and autobiographical plays Marie Stopes despite all her scientific knowledge was a sexual innocent until her mid thirties This ignorance coupled with her obsession with ideal love resulted in a first marriage that remained unconsummated after five years Marie Stopes an extraordinary woman an eccentric woman a contradictory woman a twentieth century Joan of Arc A woman who transformed her own personal struggles into a movement that came to be known as a revolution just a decade after her death in 1958 *Passionate Crusader* is an intimate inspired biography written with grace and wit as readable as any novel Readers will come to know the fascinating story of Marie Stopes as well as they know the lives of Anna Karenina Emma Bovary or Ibsen's Nora **Marie Stopes: Feminist, Eroticist, Eugenicist** William Garrett, 2008-02-01 This book brings together in a single volume Marie Stopes essential writings In his Introduction Professor Garrett sets her ideas into historical context and assesses the extent to which those ideas are and will continue to become part of the 21st century *Passionate Crusader* Ruth E. Eugenics Richard Lynn, 2001-06-30 Lynn argues that the condemnation of eugenics in the second half of the 20th century went too far and offers a reassessment The eugenic objectives of eliminating genetic diseases increasing intelligence and reducing personality disorders he argues remain desirable and are achievable by human biotechnology In this four part analysis Lynn begins with an account of the foundation of eugenics by Francis Galton and the rise and fall of eugenics in the twentieth century He then sets out historical formulations on this issue and discusses in detail desirability of the new eugenics of human biotechnology After examining the classic approach of attempting to implement eugenics by altering reproduction Lynn concludes that the policies of classical eugenics are not politically feasible in democratic societies The new eugenics of human biotechnology prenatal diagnosis of embryos with genetic diseases embryo selection and cloning may be more likely than classic eugenics to evolve spontaneously in western democracies Lynn looks at the ethical issues of human biotechnologies and how they may be used by authoritarian states to promote state power He predicts how eugenic policies and dysgenic processes are likely to affect geopolitics and the balance of power in the 21st century Lynn offers a provocative analysis that will be of particular interest to psychologists sociologists demographers and biologists concerned with issues of population change and intelligence *Abortion in England 1900-1967* Barbara Brookes, 2012-12-12 Over the decades from 1900 to 1967 abortion was transformed from an important female centred form of fertility control into a medical event closely monitored by the State This transition the author argues here took place against a background of

debate over fertility control and its implications for women's maternal role. The book originally published in 1988 suggests that the inter-war years saw a crucial mapping of boundaries in the debates over abortion. The distinction between methods of fertility control used before and after conception was more sharply drawn. The abortion law was difficult to enforce and in 1936 the Abortion Law Reform Association was founded by feminists to call for safe legal abortion as a woman's right. Resort to criminal abortion continued in the post-war years and the number of therapeutic abortions also began to increase. The medical profession's attempt to create a distinction between worthy medical and spurious social reasons for fertility control gave way in the face of women's demands for safe and effective means to plan when and if they would have children. After a hard-fought battle, the abortion law was reformed in 1967. The abortion decision, however, remained firmly in the hands of the medical profession.

Reproductive Restraints Sanjam Ahluwalia, 2010-10-01. *Reproductive Restraints* traces the history of contraception use and population management in colonial India while illuminating its connection to contemporary debates in India and birth control movements in Great Britain and the United States. Sanjam Ahluwalia draws attention to the interactive and relational history of Indian birth control by including western activists such as Margaret Sanger and Marie Stopes alongside important Indian campaigners. In revealing the elitist politics of middle-class feminists, Indian nationalists, western activists, colonial authorities, and the medical establishment, Ahluwalia finds that they all sought to rationalize procreation and regulate women while invoking competing notions of freedom, femininity, and family. Ahluwalia's remarkable interviews with practicing midwives in rural northern India fill a gaping void in the documentary history of birth control and shows that the movement has had little appeal to non-elite groups in India. Finding that Jaunpuri women's reproductive decisions are bound to their emotional, cultural, and economic reliance on family and community, Ahluwalia presents the limitations of universal liberal feminist categories which often do not consider differences among localized subjects. She argues that elitist birth control efforts failed to account for Indian women's values and needs and have worked to restrict reproductive rights rather than liberate subaltern Indian women since colonial times.

Sibyl-child, 1978 **Feminism and Motherhood in Western Europe, 1890-1970** A. Allen, 2005-06-30. According to Allen, motherhood and citizenship are terms that are closely linked and have been redefined over the past century due to changes in women's status, feminist movements, and political developments. Mother-child relationships were greatly affected by political decisions during the early 1900s, and the maternal role has been transformed over the years. To understand the dilemmas faced by women concerning motherhood and work, for example, Allen argues that the problem must be examined in terms of its demographic and political development through history. Allen highlights the feminist movements in Western Europe, primarily Britain, France, Germany, and the Netherlands, and explores the implications of the maternal role for women's aspirations to the rights of citizenship. Among the topics Allen explores are the history of the maternal role, psychoanalysis, and theories on the mother-child relationship. Changes in family law from 1890-1914, the economic status of mothers, and reproductive responsibility

Reader's Guide to Women's Studies Eleanor Amico, 1998-03-20 The Reader's Guide to Women's Studies is a searching and analytical description of the most prominent and influential works written in the now universal field of women's studies. Some 200 scholars have contributed to the project which adopts a multi-layered approach allowing for comprehensive treatment of its subject matter. Entries range from very broad themes such as Health General Works to entries on specific individuals or more focused topics such as Doctors. *In the Name of Eugenics* Daniel J. Kevles, 2013-05-08 Daniel Kevles traces the study and practice of eugenics, the science of improving the human species by exploiting theories of heredity from its inception in the late nineteenth century to its most recent manifestation within the field of genetic engineering. It is rich in narrative anecdote, attention to human detail and stories of competition among scientists who have dominated the field.

The Manuscript Inventories and the Catalogs of Manuscripts, Books, and Periodicals: Book catalog, Mae-Pin Arthur and Elizabeth Schlesinger Library on the History of Women in America, 1984. **Histories of Sexuality** Stephen Garton, 2014-12-18 This book presents the first assessment of one of the most rapidly expanding fields of research, the history of sexuality. From the early efforts of historians to work out a model for sexual history to the extraordinary impact of French philosopher Michel Foucault to the vigorous debates about essentialism and social constructionism to the emergence of contemporary debates about historicism, queer theory, embodiment, gender and cultural history, we now have vast and diverse historical scholarship on sex and sexuality. *Histories of Sexuality* highlights the key historical moments and issues: pederasty and cultures of male passivity in ancient Greece and Rome; the impact of early Christianity and ideals of renunciation on the sexual cultures of late antiquity; the sustained existence of homosexual cultures in medieval and renaissance Europe; the invention of homosexuality and heterosexuality in eighteenth-century Europe and America; the truth behind Victorian sexual repression; the work of reformers and scientists such as Havelock Ellis, Marie Stopes, Stella Browne, Margaret Sanger, Alfred Kinsey, William Masters and Virginia Johnson. *Biographies of British Women* Patricia E. Sweeney, 1993. **Desire** Anna Clark, 2008. A sweeping survey of sexuality in Europe from the Greeks to the present. *Desire* follows changing attitudes toward sexuality through the major turning points of European history. Drawing on a rich array of sources including poetry, novels, pornography and film as well as court records, autobiographies and personal letters, this volume integrates the history of heterosexuality with same-sex desire and explores the emotions of love and lust as well as the politics of sex and personal experiences. **Alone! Alone!** Rosemary Dinnage, 2004. Some of these women knew isolation through their dedication to duty and others through their immersion in writing, painting or politics. Some juggled with fantasy worlds in which they could end up stranded. Others learned the fine art of survival, fighting illness, hard childhoods or a hostile public. All of them, whether trying to construct a life or a work of art or both, suggest ways in which women can choose to learn, laugh, invent, dare and, of course, wholeheartedly love or hate. *International Intercourse* Julie L. Thomas, 2004. American birth control advocate Margaret Sanger, 1884-1966, was instrumental in the development of an international birth control movement. This occurred

not after World War II as is commonly thought but in the interwar era Building upon existing medical exchanges of information and materials in the global arena she established a social movement for birth control While Sanger was not the only interwar era figure involved in the endeavor she was among the most active in pursuing an international agenda A number of discursive themes emerge in the study of Sanger s interwar activities for the global provision of contraception it would provide economic benefit to individual families and collective nations family limitation would help avert the next war and gendered ideas about contraceptive methods and its role in improving women s status These themes are explored through an interrogation of Sanger s interactions with cohorts travel and correspondence in seven key nations in Europe Asia and Southeast Asia her role as founder and editor of the Birth Control Review and lastly as the organizer of three international birth control conferences 1925 1927 1930 The preoccupations established in these venues laid the foundation for the post World War II international family planning movement This dissertation project also challenges a prevailing assumption about the provision of birth control in the Soviet Union in the interwar ear that abortion was the only method available An analysis of Soviet medical literature of the period reveals the existence of clinical and laboratory research on a range of contraceptive methods and research on experimental methods Curiously medical advocates for birth control and not Sanger were the most active in efforts to exchange information with Soviet researchers The explanation for this apparent anomaly underscores Sanger s goals and objectives as a social advocate for birth control in the global arena

The Shaping of History Judith Binney, 2021-05-07 The writing of history will only flourish if there is a vehicle for its publication such as Sir Keith Sinclair s vision when he founded The New Zealand Journal of History in 1967 Since then the journal has been the conduit for a flow of remarkable history writing The Shaping of History brings together a selection of essays from its first 30 years by some of the nation s best known historians including Judith Binney Tipene O Regan Claudia Orange Barbara Brookes Alan Ward Jock Phillips and Jamie Belich Their sharp analysis and great storytelling make the collection an essential resource for understanding how New Zealand history is shaped
