## **Passport In International Law:**

**Nationality and Statelessness in International Law** Paul Weis, 1979-12-13 This second revised edition takes into account the decision of the International Court of Justice in the *Nottebohm Case* which was published just as the first edition was going to press and therefore received only cursory treatment It also of course includes an analysis of international legislation adopted since 1955 including the 1961 UN Convention on the Reduction of Statelessness the 1957 UN Convention on the Nationality of Married Women and the 1966 International Covenant on Civil and Political Rights The decisions of international tribunals and in particular of the Italian Conciliation Commissions are analysed Finally the author presents legislative judicial and governmental practice during the twenty two years After beginning with a clear definition of terms the author analyses the functions of nationality in international law the relationship between municipal and international law and then the public international law of nationality In this latter part he examines international conventions international custom and the principles of law generally recognized with regard to nationality The book ends with a summary and conclusions dealing with the existing law and future developments The Passport in International Law Daniel C. Turack, 1972

International Law's Objects Jessie Hohmann, Daniel Joyce, 2018 International law's rich existence in the world can be illuminated by its objects International law is often developed conveyed and authorized through its objects and or their representation From the symbolic the regalia of the head of state and the symbols of sovereignty to the mundane a can of dolphin safe tuna certified as complying with international trade standards international legal authority can be found in the objects around us Similarly the practice of international law often relies on material objects or their image both as evidence satellite images bones of the victims of mass atrocities and to found authority for instance maps and charts This volume considers these questions firstly what might the study of international law through objects reveal What might objects rather than texts tell us about sources recognition of states construction of territory law of the sea or international human rights law Secondly what might this scholarly undertaking reveal about the objects as aims or projects of international law How do objects reveal or perhaps mask these aims and what does this tell us about the reasons some physical or material objects are foregrounded and others hidden or ignored Thirdly what objects icons and symbols preoccupy the profession and academy The personal selection of these objects by leading and emerging scholars worldwide will illuminate the contemporary and historical fascinations of international lawyers By considering international law in the context of its material culture the authors offer a new and exciting theoretical perspective on the subject With an image of each object reproduced in full colour the book will make an engaging and interesting read for scholars practitioners and students alike *Handbook of International Law* Anthony Aust, 2010-04-01 To the new student of international law the subject can appear extremely complex a system of laws created by states international courts and tribunals operating at the national and global level A clear guide to the subject is essential to ensure understanding This handbook provides exactly that written by an expert who

both teaches and practises in the field it focuses on what the law is how it is created and how it is applied to solve day to day problems It offers a practical approach to the subject giving it relevance and immediacy The new edition retains a concise user friendly format allowing central principles such as jurisdiction and the law of treaties to be understood In addition it explores more specialised topics such as human rights terrorism and the environment This handbook is the ideal introduction for students new to international law

The Invention of the Passport John C. Torpey,2018-07-26 This book presents the first detailed history of the modern passport and why it became so important for controlling movement in the modern world It explores the history of passport laws the parliamentary debates about those laws and the social responses to their implementation The author argues that modern nation states and the international state system have monopolized the legitimate means of movement rendering persons dependent on states authority to move about especially though not exclusively across international boundaries This new edition reviews other scholarship much of which was stimulated by the first edition addressing the place of identification documents in contemporary life It also updates the story of passport regulations from the publication of the first edition which appeared just before the terrorist attacks of 9 11 to the present day

*Law's Documents* Katherine Biber,Trish Luker,Priya Vaughan,2021-12-29 Illuminating their breadth and diversity this book presents a comprehensive and multidisciplinary view of legal documents and their manifold forms uses materialities and meanings In 1951 Suzanne Briet a librarian at the Bibliotheque Nationale in Paris famously said that an antelope in a zoo could be a document thereby radically changing the way documents were analysed and understood In the fifty years since this pronouncement the digital age has introduced a potentially limitless range of digital and technological forms for the capture and storage of information In their multiplicity and their ubiquity documents pervade our everyday life However the material intellectual aesthetic and political dimensions and effects of documents remain difficult to pin down Taking a multidisciplinary and international approach this collection tackles the question what is a legal document in order to explore the material aesthetic and intellectual attributes of legal documentation the political and colonial orders reflected and embedded in documents and the legal archival and social systems which order and utilise information As well as scholars in law documentary theory history Indigenous studies art history and design theory and practice this book will also appeal to those working in libraries archives galleries and museums for whom the ongoing challenges of documentation
