## **Past And The Future:**

Roads from Past to Future Charles Tilly, Arthur L. Stinchcombe, 1997 Over the years Charles Tilly has had an indelible influence on a remarkable number of key questions in social science and history In the fields of social change states and institutions urbanization and historical sociology his seminal work has spawned whole new lines of inquiry and research In one volume this book offers the best and most influential of Tilly's important work with a new introduction by the author that relates his analyses to a wide body of scholarship The book includes a review and critique by Arthur Stinchcombe **All Future Plunges to the Past** José Vergara, 2021-10-15 All Future Plunges to the Past explores how Russian writers from the mid 1920s on have read and responded to Joyce's work Through contextually rich close readings Jos Vergara uncovers the many roles Joyce has occupied in Russia over the last century demonstrating how the writers Yury Olesha Vladimir Nabokov Andrei Bitov Sasha Sokolov and Mikhail Shishkin draw from Joyce's texts particularly Ulysses and Finnegans Wake to address the volatile questions of lineages in their respective Soviet migr and post Soviet contexts Interviews with contemporary Russian writers critics and readers of Joyce extend the conversation to the present day showing how the debates regarding the Irish writer's place in the Russian pantheon are no less settled one hundred years after Ulysses The creative reworkings or translations of Joycean themes ideas characters plots and styles made by the five writers Vergara examines speak to shifting cultural norms understandings of intertextuality and the polarity between Russia and the West Vergara illuminates how Russian writers have used Joyce's ideas as a critical lens to shape prod and constantly redefine their own place in literary history All Future Plunges to the Past offers one overarching approach to the general narrative of Joyce's reception in Russian literature While each of the writers examined responded to Joyce in an individual manner the sum of their methods reveals common concerns This subject raises the issue of cultural values and more importantly how they changed throughout the twentieth century in the Soviet Union Russian emigration and the post Soviet Russian environment

**Being and Nothingness** Jean-Paul Sartre, 2021-09-07 Revisit one of the most important pillars in modern philosophy with this new English translation the first in more than 60 years of Jean Paul Sartre's seminal treatise on existentialism This is a philosophy to be reckoned with both for its own intrinsic power and as a profound symptom of our time The New York Times In 1943 Jean Paul Sartre published his masterpiece Being and Nothingness and laid the foundation of his legacy as one of the greatest twentieth century philosophers A brilliant and radical account of the human condition Being and Nothingness explores what gives our lives significance In a new and more accessible translation this foundational text argues that we alone create our values and our existence is characterized by freedom and the inescapability of choice Far from being an internal passive container for our thoughts and experiences human consciousness is constantly projecting itself into the

outside world and imbuing it with meaning Now with a new foreword by Harvard professor of philosophy Richard Moran this clear eyed translation guarantees that the groundbreaking ideas that Sartre introduced in this resonant work will continue to inspire for generations to come     Politics of Time Leszek Koczanowicz,2008-08-01 What has really happened in Poland since the election of 2005 After such spectacular events as the practice of lustration and the questioning of solidarity with the European Union one has to ask what is the nature of this newly emerging society As with many of the recent developments in former communist countries that seem to be mysterious and irrational the situation and ensuing problems are complex and the answers neither trivial nor easy This book by the distinguished Polish philosopher addresses these complexities through the role of the communist past in post communist Poland It describes the events that led to the collapse of the Solidarity program and the growing influence of the nationalistic and religious parties in the government The author investigates the nature of social and political temporality and develops a theoretical framework that allows him to apply his conclusions not only to Poland but also to other formerly communist countries     The Grammar of English Grammars, with an Introduction, Historical and Critical ... This is the first book length exploration of the ways art from the edges of the Roman Empire represented the future examining visual representations of time and the role of artwork in Roman imperial systems This book focuses on four kingdoms from across the empire Cottius s Alpine kingdom in the north King Juba II s Mauretania in the south west Herodian Judea in the east and Kommagene to the north east Art from the imperial frontier is rarely considered through the lens of the aesthetics of time and Roman provincial art and the monuments of allied rulers are typically interpreted as evidence of the interaction between Roman and local identities In this interdisciplinary study which explores statues wall paintings coins monuments and inscriptions readers learn that these artworks served as something more they were created to represent the futures that allied rulers and their people foresaw The pressure of Roman imperialism drove patrons and artists on the empire s borders to imbue their creations with increasingly sophisticated ideas about the future as they wrestled with consequential decisions made under periods of intense political pressure Comprehensively illustrated and providing an important new approach to Roman material culture at the edge of empire **Visions of the Future in Roman Frontier Kingdoms 100 BCE 100 CE** is suitable for students and scholars working on Rome and its frontiers as well as Roman material culture more broadly and those studying the aesthetics of time in art and art history      **Time in Ecology** Eric Post,2019-02-26

Ecologists traditionally regard time as part of the background against which ecological interactions play out In this book Eric Post argues that time should be treated as a resource used by organisms for growth maintenance and offspring production Post uses insights from phenology the study of the timing of life cycle events to present a theoretical framework of time in ecology that casts long standing observations in the field in an entirely new light Combining conceptual models with field data he demonstrates how phenological advances delays and stasis documented in an array of taxa can all be viewed as adaptive components of an organism s strategic use of time Post shows how the allocation of time by individual organisms to critical life history stages is not only a response to environmental cues but also an important driver of interactions at the population species and community levels To demonstrate the applications of this exciting new conceptual framework **Time in Ecology** uses meta analyses of previous studies as well as Post s original data on the phenological dynamics of plants caribou and muskoxen in Greenland      *Constructing Identity in and around Organizations* Majken Schultz,Steve Maguire,Ann

Langley,Haridimos Tsoukas,2012-01-19 *Constructing Identity in and around Organizations* is the second volume in *Perspectives on Process Organization Studies* a series which explores an emerging approach to the study of organizations that focuses on understanding activities interactions and change as essential properties of organizations rather than structures and state an approach which prioritizes activity over product change over persistence novelty over continuity and

expression over determination The constructing of identities those processes through which actors in and around organizations claim accept negotiate affirm stabilize maintain reproduce challenge disrupt destabilize repair or otherwise relate to their sense of selves and others has become a critically important topic in the study of organizations This volume attempts to amplify and possibly refract contemporary debates amongst identity scholars that question established notions of identity as essence entity or thing It calls for alternative approaches to understanding identity and its significance in contexts in and around organizations by conceptualizing it as process that is being continually under construction Based in diverse theoretical and philosophical traditions and contexts contributions by leading scholars to this volume offer new perspectives on how individual and organizational identities evolve and come to be constructed through ongoing activities and interactions

**Key Metaphors for History** Javier Fernández-Sebastián, 2024-04-03 This book casts a fresh look at what to date has been a relatively unexplored question the enormous value and usefulness of the metaphor in the understanding and writing of history and at the historical culture reflected by these metaphors Mapping a wide range of tropes present in historiography and public discourse the book identifies some of the key metaphorical resources employed by historians politicians and journalists to represent time history memory the past the present and the future and examines a selection of analytical concepts of a temporal nature built upon unmistakably metaphorical foundations such as modernity event process revolution crisis progress decline or transition The analysis of these and other pillars on which modern history has been built whether as a philosophy of history as an academic discipline or as a set of events will interest graduates and scholars dealing with the historical and social sciences and the humanities in general Key Metaphors for History offers a broad overview of historiography and historiosophy from an unfrequented point of view halfway between conceptual history theory of history and metaphorology Moreover it constitutes a form of self reflection of the historian on his or her own positionality when researching and writing history
