Cinema Against Doublethink David Martin-Jones, 2018-09-28 When is it OK to lie about the past If history is a story then everyone knows that the official story is told by the winners No matter what we may know about how the past really happened history is as it is recorded this is what George Orwell called doublethink But what happens to all the lost forgotten censored and disappeared pasts of world history Cinema Against Doublethink uncovers how a world of cinemas acts as a giant archive of these lost pasts a vast virtual store of the world's memories The most enchanting and disturbing films of recent years Uncle Boonmee Who Can Recall his Past Lives Nostalgia for the Light Even the Rain The Act of Killing Carancho Lady Vengeance create ethical encounters with these lost pasts covering vast swathes of the planet and crossing huge eras of time Analysed using the philosophies of Gilles Deleuze the time image and Enrique Dussel transmodern ethics the multitudinous cinemas of the world are shown to speak out against doublethink countering this biggest lie of all with their myriad false versions of world history Cinema acting against doublethink remains

a powerful agent for reclaiming the truth of history for the post truth era *Interrogatio Iohannis (The Secret Book of the Cathars) and Apokryphon Iohannis (The Secret Book of John)* M.P. Steiner, 2020-02-18 Modern text research shows that biblical tradition often does not at all correspond to real historical events This lessens neither the inner significance of the Bible nor of true Christendom for true Christendom is more than just a religion It is the spiritual Sphere of Life that embraces all Worlds with all their Mysteries Some results of modern research as collected and presented here in a dense form clearly contradict canonical narratives and might provoke different reactions from condescending shaking of heads to apalled outcries But neither will diminish their validity After 2000 years of nominal Christianity it is now time to animate truly spiritual Christendom This new Christendom is on one side a renewal of the classical antique Mysteries with the Christ Jesus as the last and greatest Avatar of the Sun Spirit descended to Earth as the Redeemer of the World and on the other a complete renewal of religious thinking and feeling of humans everyone now being summoned to realize their potential microcosmical Cristos in today's spiritual freedom with its world wide new paradigmata The two texts published here in best possible accuracy are especially important because combined with a deeply founded introduction they at last publicly present the world of faith of the true Arch Christians of the first centuries and their comprehension of events from Bethlehem to Golgotha Based on said insights the book here in hand undertakes to define a new Christendom for a new Era A Christendom that must not just be believed in sheepish obedience but lived out of mature consciousness and in a daily effort of every single human Its purpose is to encourage a large number of people to experience this new Light Truth and Life Numerous book references many in part extensive notes and a number of full page images show the credibility of the new view and enlarge the usual dogmatic picture A book that read in a leisurly pace and with open soul and heart may bring about new clarity and a new vivid faith for the old message German edition Same title ISBN 9783907103050 International Books in Print ,1986 **Presbyterian Banner** ,1908 **The Making of History** M. A. Rabie, 2001-07-29 This book describes the development of human societies over time and identifies the major forces of change that guide history and influence its course The book argues that the course of history has been driven not by leaders states ideas or war but rather by four societal processes whose actions reactions and interactions have governed the nature and pace of historical change These processes are the socio cultural political economic and infomedia processes Three major conceptions of world history the cyclical linear and chaotic have tried to describe the course of history and explain the dynamics of change This book reviews these conceptions and concludes that each one of them is only partially able to provide an understanding of the historical dynamics of change The book incorporates these conceptions into one theory the locomotive theory of history that provides a comprehensive explanation of the movement and dynamics of change throughout history The locomotive theory explains why certain nations have made more progress than others why some people are getting richer while others remain poor and why democracy has succeeded in some countries and failed in others The multiplicity of issues that the book covers makes its

analysis and conclusions of particular interest to all people engaged in politics economics socioeconomic development and globalization
