Past Futures The Impossible Necessity Of History:

Past Futures Ged Martin, 2004-12-15 By nature human beings seek to make sense of their past Paradoxically true historical explanation is ultimately impossible Historians never have complete evidence from the past nor is their methodology rigorous enough to prove causal links Although it cannot be proven that A caused B by redefining the agenda of historical discourse scholars can locate events in time and place history once again at the heart of intellectual activity In *Past Futures* Ged Martin advocates examining the decisions that people take most of which are not the result of a process but are reached intuitively Subsequent rationalizations that constitute historical evidence simply mislead All historians can do is to locate them in time to explain not why a decision was taken but why then To illustrate Martin asks a number of questions What is a long time in history Are we close to the past or remote from it Is democracy a recent experiment or proof of our arrival at the end of a journey through time Can we engage in a historical dialogue with the past without making clear our own ethical standpoints Although explanation is ultimately impossible humankind can make sense of its location in time through the concept of significance a device for highlighting events and aspects of the past In so doing Martin suggests a radical new approach to historical discourse

An Anthropological Toolkit David Zeitlyn, 2022-09-13 Presenting sixty theoretical ideas David Zeitlyn asks How to write about anthropological theory without making a specific theoretical argument David Zeitlyn has written a wryly engaging short book on essentially why we should not become theoretical partisans that indeed being a serious theorist means accepting precisely that principle Michael Herzfeld Harvard University To answer he offers a series of mini essays about an eclectic collection of theoretical concepts that he has found helpful over the years The book celebrates the muddled inconsistencies in the ways that humans live their messy lives There are however still patterns discernible the actors can understand what is going on they see an event unfolding in ways that are familiar as belonging to a certain type and therefore Zeitlyn suggests so can researchers From the introduction This book promotes an eclectic multi faceted anthropology in which multiple approaches are applied in pursuit of the limited insights which each can afford I do not endorse any one of these idea as supplying an exclusive path to enlightenment I absolutely do not advocate any single position As a devout nonconformist I hope that the following sections provide material ammunition and succour to those undertaking nuanced anthropological analysis and their kin in related disciplines Mixing up or combining different ideas and approaches can produce results that in their breadth and richness are productive for anthropology and other social sciences reflecting the endless complexities of real life This is my response to the death of grand theory I see our task as learning how to deal with that bereavement and how to resist the siren lures of those promising synoptic overviews This book is relevant to anthropology communication studies cultural studies and sociology [Canadian Books in Print.](#)
