an extended analysis of the development of L2 Spanish past tense morphology among L1 English speaking learners The study addresses three major questions 1 what is the developmental pattern of acquisition of past tense verbal morphology among tutored learners 2 what are the relevant factors that may account for the particular distribution of morphological endings especially at the beginning stages and 3 how does instruction affect the movement from one stage to the next The analysis provides a reassessment of the general claim of Andersen s lexical aspect hypothesis and proposes minor changes that may render the hypothesis more appropriate for especially L2 classroom learning The study includes an overview of theoretical positions on the notion of lexical versus grammatical aspect and a comparison of the findings from previous empirical studies on the development of past tense verbal morphology among both classroom and naturalistic learners Time and the Verb Robert I. Binnick,1991-06-20 This comprehensive examination of tense and grammatical aspect provides fascinating insight into how languages indicate distinctions of time Providing an in depth survey of the scholarship from the ancient Greeks through the 1980s Time and the Verb explains and evaluates every major issue and theory concentrating on familiar Classical and modern European languages An invaluable reference tool as well as a major contribution to the history of linguistic sciences this book will be the standard against which future work on tense and aspect is measured **Politics and the Past** John Torpey,2004-09-01 Politics and the Past offers an original multidisciplinary exploration of the growing public controversy over reparations for historical injustices Demonstrating that reparations politics has become one of the most important features of international politics in recent years the authors analyze why this is the case and show that reparations politics can be expected to be a major aspect of international affairs in coming years In addition to broad theoretical and philosophical reflection the book includes discussions of the politics of reparations in specific countries and regions including the United States France Latin America Japan Canada and Rwanda The volume presents a nuanced historically grounded and critical perspective on the many campaigns for reparations currently afoot in a variety of contexts around the world All readers working or teaching in the fields of transitional justice the politics of memory and social movements will find this book a rich and provocative contribution to this complex debate
