## **Pasyon And Revolution Popular Movements In The Philippines:**

Pasyon and Revolution Reynaldo Clemeña Iletto, 1979 Relates the impact of passion play Kasaysayan ng pasiong mahal ni Hesukristong Panginoon natin on Philippine social action      **Religion, Tradition and the Popular** Judith Schlehe, Evamaria Sandkühler, 2014-04-15 A rapid development of religious popular cultures and lifestyles can be observed across the globe This book provides unique case studies from Asia and Europe illustrating new religious practices forms of articulation and mass mediatization all of which render religious traditions significant for contemporary issues and concerns The essays examine experiences of spirituality in combination with commercialization and expressive performative practices as well as everyday politics of identity Based on innovative theoretical reflections the essays take into consideration what the transcultural negotiation of religion tradition and the popular signifies in different places and social contexts With contributions by Anthony Reid Hubert Knoblauch Ariel Heryanto Stefanie von Schnurbein and others      **The Cambridge History of Southeast Asia** Nicholas Tarling, 1999 Volume 2 discusses Southeast Asia's interaction with foreign countries during the period c 1500 to c 1800      *Imperial Material* Alvita Akiboh, 2023-11-10 An ambitious history of flags stamps and currency and the role they played in US imperialism In *Imperial Material* Alvita Akiboh reveals how US national identity has been created challenged and transformed through embodiments of empire found in US territories from the US dollar bill to the fifty star flag These symbolic objects encode the relationships between territories including the Philippines the Hawaiian Islands Puerto Rico and Guam and the empire with which they have been entangled Akiboh shows how such items became objects of local power their original intent transmogrified For even if imperial territories were not always front and center for federal lawmakers and administrators their inhabitants remained continuously aware of the imperial United States whose presence announced itself on every bit of currency every stamp and the local flag      *Environment, Scarcity, and Violence* Thomas F. Homer-Dixon, 2010-07-01 The Earth's human population is expected to pass eight billion by the year 2025 while rapid growth in the global economy will spur ever increasing demands for natural resources The world will consequently face growing scarcities of such vital renewable resources as cropland fresh water and forests Thomas Homer Dixon argues in this sobering book that these environmental scarcities will have profound social consequences contributing to insurrections ethnic clashes urban unrest and other forms of civil violence especially in the developing world Homer Dixon synthesizes work from a wide range of international research projects to develop a detailed model of the sources of environmental scarcity He refers to water shortages in China population growth in sub Saharan Africa and land distribution in Mexico for example to show that scarcities stem from the degradation and depletion of renewable resources the increased demand for these resources and or their unequal distribution He shows that these scarcities can lead to deepened poverty large scale migrations sharpened social cleavages and weakened institutions And he describes the kinds of violence that can result from these social effects arguing that conflicts in Chiapas Mexico and ongoing turmoil in many African and Asian countries for

instance are already partly a consequence of scarcity Homer Dixon is careful to point out that the effects of environmental scarcity are indirect and act in combination with other social political and economic stresses He also acknowledges that human ingenuity can reduce the likelihood of conflict particularly in countries with efficient markets capable states and an educated populace But he argues that the violent consequences of scarcity should not be underestimated especially when about half the world s population depends directly on local renewables for their day to day well being In the next decades he writes growing scarcities will affect billions of people with unprecedented severity and at an unparalleled scale and pace Clearly written and forcefully argued this book will become the standard work on the complex relationship between environmental scarcities and human violence

*Filipino Politics* David Wurfel,1991 Wurfel presents a full examination of the island republic from independence to the present placed in the context of the Philippines long and rich history He has taken advantage of new research and publications and has devoted more than a third of the study to the Marcos and Aquino administrations This is an important book a study no student of Philippine politics and society can ignore Choice

The Oxford Handbook of Christianity in Asia Felix Wilfred,2014-05-23 Named by the International Bulletin of Missionary Studies as an Outstanding Book of 2014 for Mission Studies Despite the ongoing global expansion of Christianity there remains a lack of comprehensive scholarship on its development in Asia This volume fills the gap by exploring the world of Asian Christianity and its manifold expressions including worship theology spirituality inter religious relations interventions in society and mission The contributors from over twenty countries deconstruct many of the widespread misconceptions and interpretations of Christianity in Asia They analyze how the growth of Christian beliefs throughout the continent is linked with the socio political and cultural processes of colonization decolonization modernization democratization identity construction of social groups and various social movements With a particular focus on inter religious encounters and emerging theological and spiritual paradigms the volume provides alternative frames for understanding the phenomenon of conversion and studies how the scriptures of other religious traditions are used in the practice of Christianity within Asia

**An Intercultural Theology of Migration** Gemma Cruz,2010-01-15 Migration has long been associated with the social sciences However as a phenomenon that provides windows into possibly new forms of oppression and at the same time paths toward human liberation a systematic theological look at contemporary migration is long overdue Building on the emerging interest on migration in theology this book presents an intercultural theology of migration drawn from the experience of Filipino women domestic workers in Hong Kong in dialogue with theological ethics and liberationist theologies The result is a new look at the phenomenon of contemporary migration

Seeds of the Kingdom Anna L. Peterson,2005-11-17 In these skeptical and disillusioned times there are still groups of people scattered throughout the world who are trying to live out utopian dreams These communities challenge the inevitability and morality of dominant political and economic models By putting utopian religious ethics into practice they attest to the real possibility of social alternatives In *Seeds of the Kingdom* Anna L Peterson

reflects on the experiences of two very different communities one inhabited by impoverished former refugees in the mountains of El Salvador and the other by Amish farmers in the Midwestern U S What makes these groups stand out among advocates of environmental protection political justice and sustainable development is their religious orientation They aim without apology to embody the reign of God on earth The Salvadoran community is grounded in Roman Catholic social thought while the Amish adhere to Anabaptist tradition Peterson offers a detailed portrait of these communities history social organization religious life environmental values and agricultural practices She discovers both practical and ideological commonalities in these two comparatively successful and sustainable communities including a strong collective identity deep attachment to local landscapes a desire to preserve non human as well as human lives and perhaps unexpectedly a utopian horizon that provides both goals and the hope of reaching them By examining the process by which people struggle to live according to a transcendent value system she sheds light on both the actual and the potential place of religion in public life Peterson argues that the Amish and Salvadoran communities geographically and culturally removed from the industrialized West have relevance for the political and environmental problems of the developed world These communities have succeeded in the face of significant internal and external challenges offering important practical and theoretical lessons on how to achieve ecological sustainability and social justice in the wider world

*Missions in Southeast Asia* Kiem-Kiok Kwa, Samuel Ka-Chieng Law, 2022-09-26 As the boundaries between cultures and religions blur in an increasingly globalized world the church finds itself in need of new approaches to understanding and embracing otherness both inside and outside of its established communities Southeast Asia has long been one of the world s most diverse regions with over a hundred ethnicities represented and members of every major religion living as neighbors In this rich and complex environment the church has an equally rich and complex history at times flourishing at times floundering but inexorably taking root In this collection of essays contributors from throughout the region reflect on the history and future of Christianity in Southeast Asia providing an overview of missions in the region and exploring how local churches are defining a uniquely Southeast Asian approach to interreligious engagement Combining missiological research with contextual theology this volume offers profound insight into the challenges accompanying missions in a multireligious environment From ethnic and religious conflict resolution to navigating hybrid identities this collection of essays makes an excellent contribution to global conversations surrounding the future of missions in a globalized world

*Nationalism in Southeast Asia* Nicholas Tarling, 2004-08-02 Nationalism in Southeast Asia seeks a definition of nationalism through examining its role in the history of southeast Asia a region rarely included in general books on the topic By developing such a definition and testing it out Tarling hopes at the same time to make a contribution to southeast Asian historiography and to limit its ghettoization Tarling considers the role of nationalism in the nation building of the post colonial phase and its relationship both with the democratic aspirations associated with the winning of independence and with the authoritarianism of the closing decades of

the 20th century     Multiculturalism in the United States John D. Buenker, Lormen A. Ratner, 2005-03-30 Interest in ethnic studies and multiculturalism has grown considerably in the years since the 1992 publication of the first edition of this work. Co editors Ratner and Buenker have revised and updated the first edition of *Multiculturalism in the United States* to reflect the changes patterns and shifts in immigration showing how American culture affects immigrants and is affected by them. Common topics that helped determine the degree and pace of acculturation for each ethnic group are addressed in each of the 17 essays providing the reader with a comparative reference tool. Seven new ethnic groups are included: Arabs, Haitians, Vietnamese, Koreans, Filipinos, Asian Indians, and Dominicans. New essays on the Irish, Chinese, and Mexicans are provided, as are revised and updated essays on the remaining groups from the first edition. The contribution to American culture by people of these diverse origins reflects differences in class, occupation, and religion. The authors explain the tensions and conflicts between American culture and the traditions of newly arrived immigrants. Changes over time that both of the cultures brought to America and of the culture that received them is also discussed. Essays on representative ethnic groups include African Americans, American Indians, Arabs, Asian Indians, Chinese, Dominicans, Filipinos, Germans, Haitians, Irish, Italians, Jews, Koreans, Mexicans, Poles, Scandinavians, and the Vietnamese.     **The Art of Indigenous Inculturation** Sison, Antonio D., 2021-06-16 The inculturation of the Christian message is examined through examples of art from Africa, the Philippines, and the Mexican American community.     **Everyday Politics in the Philippines** Benedict J. Kerkvliet, 2002 Focusing on a rice farming village in central Luzon, Kerkvliet argues that the faction and patron-client relationships dealt with by conventional studies are only one part of Philippine political life.     **The Philippines Reader** Daniel B. Schirmer, Stephen Rosskamm Shalom, 1987 The *Philippines Reader* illuminates the history of the continuing struggle of the Philippines people for true independence and social justice. Daniel Schirmer and Stephen Shalom have put together a single volume of readings and documents providing essential background from the turn of the century U.S. war of conquest to the new administration of Corazon Aquino. Analytical articles from varying authors explore among other topics: the nature of the U.S. colonial regime; the role of the church; conflicts with national minorities; the situation of labor, peasants, and women; and U.S. policy as well as prospects for the future. Documentary selections in this *Philippines Reader* come from such diverse sources as the CIA and the State Department, U.S. Presidents McKinley and Reagan, Philippine leaders Aguinaldo and Aquino, Philippine nationalist and left organizations such as the Anti-Base Coalition, Bayan Kaakbay, and the New People's Army, and U.S. opponents of foreign intervention. The editors introduce, explain, and tie together over eighty readings, making this the most complete introduction available on events in the Philippines.     *Figures of Criminality in Indonesia, the Philippines, and Colonial Vietnam* Vicente L. Rafael, 2018-05-31 A complex examination of criminality and the criminal as constructs and active presences in Southeast Asia. Contributors explore such themes as surveillance, incarceration, law, and custom, secrecy, and corruption. A fascinating study of power and subversion in the modern postcolonial nation-state. Contributors include Daniel S.

Lev Henk M J Maier Rudolf Mrazek James T Siegel and others      **State and Society in the Philippines** Patricio N. Abinales, Donna J. Amoroso, 2017-07-06 This clear and nuanced introduction explores the Philippines ongoing and deeply charged dilemma of state society relations through a historical treatment of state formation and the corresponding conflicts and collaboration between government leaders and social forces Patricio N Abinales and Donna J Amoroso examine the long history of institutional weakness in the Philippines and the varied strategies the state has employed to overcome its structural fragility and strengthen its bond with society The authors argue that this process reflects the country s recurring dilemma on the one hand is the state s persistent inability to provide essential services guarantee peace and order and foster economic development on the other is the Filipinos equally enduring suspicions of a strong state To many citizens this powerfully evokes the repression of the 1970s and the 1980s that polarized society and cost thousands of lives in repression and resistance and billions of dollars in corruption setting the nation back years in economic development and profoundly undermining trust in government The book s historical sweep starts with the politics of the pre colonial era and continues through the first year of Rodrigo Duterte s controversial presidency      Communication against Capital Rianne Subijanto, 2025-02-15 Communication against Capital explores the revolutionary communication strategies of the pergerakan merah the anticolonial red movement in 1920s Indonesia Rianne Subijanto tells the story of ordinary lower class women and children and people of diverse races and ethnicities who waged their battles against Dutch colonialism within multiple arenas of communication including political associations assemblies printed matter schools and shipping lines Existing communication technologies were repurposed into mechanisms of struggle and used as weapons in anticolonial and anticapitalist resistance In this process communist ideas merged with ideals drawn from the Enlightenment to shape the emancipatory spirit of Indonesians This red enlightenment motivated the production of revolutionary communication strategies of mobilization Subijanto s innovative work shows that the novel techniques of the pergerakan merah served to shift anticolonial mobilization in Indonesia from warfare to modern forms of communication      **Colonial Counterpoint** D. R. M. Irving, 2010-06-03 Named one of BBC History Magazine s Books of the Year in 2010 In this groundbreaking study D R M Irving reconnects the Philippines to current musicological discourse on the early modern Hispanic world For some two and a half centuries the Philippine Islands were firmly interlinked to Latin America and Spain through transoceanic relationships of politics religion trade and culture The city of Manila founded in 1571 represented a vital intercultural nexus and a significant conduit for the regional diffusion of Western music Within its ethnically diverse society imported and local musics played a crucial role in the establishment of ecclesiastical hierarchies in the Philippines and in propelling the work of Roman Catholic missionaries in neighboring territories Manila s religious institutions resounded with sumptuous vocal and instrumental performances while an annual calendar of festivities brought together many musical traditions of the indigenous and immigrant populations in complex forms of artistic interaction and opposition Multiple styles and genres coexisted

according to strict regulations enforced by state and ecclesiastical authorities and Irving uses the metaphors of European counterpoint and enharmony to critique musical practices within the colonial milieu He argues that the introduction and institutionalization of counterpoint acted as a powerful agent of colonialism throughout the Philippine Archipelago and that contrapuntal structures were reflected in the social and cultural reorganization of Filipino communities under Spanish rule He also contends that the active appropriation of music and dance by the indigenous population constituted a significant contribution to the process of hispanization Sustained enharmonic engagement between Filipinos and Spaniards led to the synthesis of hybrid syncretic genres and the emergence of performance styles that could contest and subvert hegemony Throwing new light on a virtually unknown area of music history this book contributes to current understanding of the globalization of music and repositions the Philippines at the frontiers of research into early modern intercultural exchange
