Many Wests David M. Wrobel,Michael C. Steiner,1997 What does it mean to live in the West today Do people tend to identify with states with regions or with the larger West This book examines the development of regional identity in the American West demonstrating that it is a regionally diverse entity made up of many different wests Great Plains Southwest Rocky Mountains and more in which American regionalism finds its fullest expression These fourteen original essays tell how a sense of place emerged among residents of various regions and how a sense of those places was developed by people outside of them Wrobel and Steiner first offer a compelling overview of the West s regional nature then thirteen other rising or renowned scholars from history American Studies geography and literature tell how regional consciousness formed among inhabitants of particular regions All of the essays address the larger issue of the centrality of place in determining social and cultural forms and individual and collective identities Some focus on race and culture as the primary influences on regional consciousness while others emphasize environmental and economic factors or the influence of literature Some even examine western regionalism

in areas that lie beyond the West as it has traditionally been conceived Each of the contributors believes that where a people live helps determine what they are and they write not only about the many wests within the larger West but also about the constant state of flux in which regionalism exists Many books speak of the West as a place but few others deal with the West as different places Many Wests presents a vision of the West that reflects both the common heritage and unique character of each major subregion building on the revisionist impulse of the last decade to help redirect New Western History toward an appreciation of regional diversity and integrate scholarship in the regional subfields It is a book for everyone who lives in studies or loves the West for it confirms that it is home to very different peoples economies histories and regions **No**

Place for a Woman Chris Enss, 2020-02-14 In 1869 more than twenty years after Elizabeth Cady Stanton and Susan B Anthony made their declaration of the rights of woman at Seneca Falls New York the men of the Wyoming Territorial Legislature granted women over the age of 21 the right to vote in general elections And on September 6 1870 a grandmother named Louisa Ann Swain stepped up to a ballot box in Laramie Wyoming and became the first woman in the United States to exercise that right ushering in the era of Western states early foray into suffrage equality Wyoming Territory's motives for extending the vote to women might have had more to do with publicity and attracting female settlers than with any desire to establish a more egalitarian society However individual men's interests in the idea of women's rights had their roots in diverse ideologies and the women who agitated for those rights were equally diverse in their attitudes No Place for a Woman explores the history of the fight for women's rights in the West examining the conditions that prevailed during the vast migration of pioneers looking for free land and opportunity on the frontier the politics of the emerging Western territories at the end of the Civil War and the changing social and economic conditions of the country recovering from war and on the brink of the Gilded Age The stories of the women who helped settle the West and who ushered in voting rights decades ahead of the 19th Amendment and the stories of the country they were forging in the West will be of great interest to readers as the 100th anniversary of national woman suffrage approaches and is relevant in our current political climate Through the individual stories of women like Esther Hobart Morris Martha Cannon and Jeannette Rankin this book fills a hole in the story of the West revealing the real story of how the hard work and individual lobbying of a few heroines plus a little bit of publicity seeking and opportunism by promoters of the Wyoming Territory ushered in a new era for the expansion of women's rights

Class and Gender Politics in Progressive-Era Seattle John C. Putman,2008-02-28 The dawn of the twentieth century saw enormous changes throughout the United States reflecting technological advances population growth widespread industrialization and the establishment of a national market economy In the Far West these changes combined with the rapid westward expansion of advanced capitalism and the impact of national political and economic pressures brought with them a period of political conflict social upheavals and labor struggles They also helped westerners define themselves their values and their relationship to the rest of the nation Seattle was one of the western cities that boomed during this period By the end of the nineteenth century the city was home to several powerful and influential labor organizations as well as a vibrant middle class feminist movement In this turbulent interface of class gender politics and sometimes race residents struggled to cope with a changing social order and with differing and at times conflicting visions of what the West was supposed to be In this book historian John C Putman expands our understanding of the roles that gender and class played in the construction of progressive politics He also shows how regional differences in this case the unique environment of the Pacific Northwest contributed to Seattle's economic and political development The feminist and militant leftwing labor movements of progressive era Seattle and the volatile interactions between them represent much more than colorful events in the city's early history Here cross class reformist coalitions between labor radical forces and women were central to the way residents made sense of their changing environment and defined both the way they saw themselves and the way others perceived them **Class and Gender Politics in Progressive Era Seattle** is an essential contribution to our understanding of the creation of the modern West and the development of regional identity and self awareness
