Progress in Intercalation Research H.W. de Jong,2013-12-01 If a book needs a third edition because the previous ones are sold out one may well question whether an introduction is necessary However the Structure of European Industry was meant to be a flexible book keeping it in tune with actual developments in the European Community Some explanation is therefore required Two new chapters on the services industry have been included to recognize the growing importance of what is fundamentally a bundle of industries It is also increasingly acknowledged that the motorcar industry for its efficiency and innovativeness is very much dependent on the numerous suppliers large and small of the component parts industry A chapter reflecting on the strengths and weaknesses of the European car supplying industries is therefore most welcome Finally European competition policy now fitted out with the Merger Control Regulation is moving

more and more towards the centre of stage and the final chapter presents a survey of the aims and achievements of this type of policy up till now steadfastly developed by the EC Commission For the rest the chapters which were already in the previous edition have been updated and have partly been rewritten by the authors concerned The editor is most grateful to old and new contributors for their efforts to jointly produce a book which after 12 years is still unique in providing a

supply and demand social factors frequently intervene Sales at auction are determined not simply by a seller's personal knowledge of customers Shareholder attitudes and employee organization influence everything from the way firms borrow money to the way corporate performance is measured Firms themselves operate in social networks in which trust is a crucial factor in settling the terms for cooperation or competition Throughout the essays in this volume the contributors point the way to developing a more healthy economy by fostering productive industrial networks avoiding disintegration at management levels and anticipating the consequences of the shift from manufacturing to service industries Explorations in Economic Sociology is a pioneering work that bridges the gap between social theory and economic analysis and demonstrates the importance of this union in achieving an effective understanding of economic issues The book should stimulate new interest in economic sociology by bringing together many of its most fundamental voices
