Lost In Space Geographies Of Science Fiction Continuum Collection:

Lost in Space Rob Kitchin, James Kneale, 2005-12-23 Science fiction one of the most popular literary cinematic and televisual genres has received increasing academic attention in recent years For many theorists science fiction opens up a space in which the here and now can be made strange or remade where virtual reality and cyborg are no longer gimmicks or predictions but new spaces and subjects Lost in space brings together an international collection of authors to explore the diverse geographies of spaceexploring imagination nature scale geopolitics modernity time identity the body power relations and the representation of space The essays explore the writings of a broad selection of writers including J G Ballard Frank Herbert Marge Piercy Kim Stanley Robinson Mary Shelley and Neal Stephenson and films from Bladerunner to Dark City The Fly The Invisible Man and Metropolis *Horror in Space* Michele Brittany, 2017-11-21 In sharp contrast to many 1960s science fiction films with idealized views of space exploration Ridley Scott's Alien 1979 terrified audiences depicting a harrowing and doomed deep space mission The Alien films launched a new generation of horror set in the great unknown inspiring filmmakers to take Earth bound franchises like Leprechaun and Friday the 13th into space This collection of new essays examines the space horror subgenre with a focus on such films as Paul W S Anderson's Event Horizon Duncan Jones Moon Mario Bava's Planet of the Vampires and John Carpenter's Ghosts of Mars Contributors discuss how filmmakers explored the concepts of the final girl survivor the uncanny valley the isolationism of space travel religion and supernatural phenomena **J.G. Ballard's Surrealist Imagination** Jeannette Baxter, 2016-12-05 Making the case that J G Ballard's fictional and non fictional writings must be read within the framework of Surrealism Jeannette Baxter argues for a radical revisioning of Ballard that takes account of the political and ethical dimensions of his work Ballard's appropriation of diverse Surrealist aesthetic forms and political writings Baxter suggests are mobilised to contest official narratives of postwar history and culture and offer a series of counter historical and counter cultural critiques Thus Ballard's work must be understood as an exercise in Surrealist historiography that is politically and ethically engaged Placing Ballard's illustrated texts within this critical framework permits Baxter to explore the effects of photographs drawings and other visual symbols on the reading experience and the production of meaning Ballard's textual spectacles raise a variety of questions about the shifting role of the reader and the function of the written text within a predominantly visual culture while acknowledging the visual contexts of Ballard's Surrealist writings allows a very different historical picture of the author and his work to emerge To Seek Out New Worlds J. Weldes, 2003-05-01 This volume explores the science fiction world politics intertext Through detailed analyses of such texts as Blade Runner Stalker Star Trek and Buffy the Vampire Slayer the chapters in this volume examine the complex and sometimes contradictory relations between world politics both as discipline and as practice and discourses of science fiction Offering a novel combination of popular culture analysis with major theoretical and empirical issues concerning world politics Science Fiction and World Politics provides insights into the discursive constitution of both science

fiction and world politics while highlighting the occasional challenges that the science fiction world politics intertext launches at our common sense Future Cities Nick Dunn, Paul Cureton, 2020-12-10 What might our cities look like in ten twenty or fifty years How may future cities face global challenges Imagining the city of the future has long been an inspiration for many architects artists and designers This book examines how cities of the future have been visualised what these projects sought to communicate and what the implications may be for us now It provides a visual history of the future and explores the relationships between different visualisation techniques and ideologies for cities Thinking about what futures are who they are for why they are desirable and how and when they are to be brought into being is central to this book Through visualisation we are able to experiment in ways that would be impractical and potentially hazardous in the real world and this book therefore aims to contribute toward a better understanding of the power and agency of visualisations for future cities In this lavishly illustrated text the authors apply several critical lenses to consider the subject in different ways technological futures social futures and global futures providing a comprehensive survey and analysis of visions for future cities and engaging creatively with how we perceive tomorrow's world and future studies more widely Science Fiction Literature through History Gary Westfahl, 2021-07-19 This book provides students and other interested readers with a comprehensive survey of science fiction history and numerous essays addressing major science fiction topics authors works and subgenres written by a distinguished scholar This encyclopedia deals with written science fiction in all of its forms not only novels and short stories but also mediums often ignored in other reference books such as plays poems comic books and graphic novels Some science fiction films television programs and video games are also mentioned particularly when they are relevant to written texts Its focus is on science fiction in the English language though due attention is given to international authors whose works have been frequently translated into English Since science fiction became a recognized genre and greatly expanded in the 20th century works published in the 20th and 21st centuries are most frequently discussed though important earlier works are not neglected The texts are designed to be helpful to numerous readers ranging from students first encountering science fiction to experienced scholars in the field City Phil Hubbard, 2006-09-27 City provides an accessible yet critical introduction to one of the key concepts in human geography Always at the heart of discussions in social theory the definition and specification of the city nonetheless remains illusive In this volume Phil Hubbard locates the concept of the city within current traditions of social thought providing a basis for understanding its varying usages and meanings through a critical discussion of the contribution of key authors and thinkers Written in a lively and accessible style the individual chapters of City offer a thematic overview of four dominant ways of approaching cities as lived in places as imagined spaces as networks of association as technologies of flow Drawing on a diverse range of literatures and case studies the book spells out the importance of a geographical perspective on the city suggesting that it is only by bringing these different ways of mapping the city together that we can begin to make sense of cities *The Empire's of J. G. Ballard* David

Ian Paddy, 2015-08-25 J G Ballard once declared that the most truly alien planet is Earth and in his science fiction he abandoned the traditional imagery of rocket ships traveling to distant galaxies to address the otherworldliness of this world. The Empires of J G Ballard is the first extensive study of Ballard's critical vision of nation and empire of the political geography of this planet. Paddy examines how Ballard's self-perceived status as an outsider and exile the Sheppertonian from Shanghai generated an outlook that celebrated worldliness and condemned parochialism. This book brings to light how Ballard wrestled with notions of national identity and speculated upon the social and psychological implications of the post-war transformation of older models of empire into new imperialisms of consumerism and globalization. Presenting analyses of Ballard's full body of work with its tales of reverse colonization, psychological imperialism, the savagery of civilization, estranged Englishmen abroad and at home, and multinational communities built on crime, The Empires of J G Ballard offers a fresh perspective on the fiction of J G Ballard. The Empires of J G Ballard: An Imagined Geography offers a sustained and highly convincing analysis of the imperial and post-imperial histories and networks that shape and energise Ballard's fictional and non-fictional writings. To what extent can Ballard be considered an international writer? What happens to our understanding of his post-war science fictions when they are opened up to the language and logics of post-colonialism? And what creative and critical roles do the spectres of empire play in Ballard's visions of modernity? Paddy follows these and other fascinating lines of enquiry in a study that is not only essential reading for Ballard students and scholars but for anyone interested in the intersections of modern and contemporary literature, history and politics. Jeanette Baxter, Anglia Ruskin University, Shanghai. I made my father arrive in England after WW2; he was a person of the world who'd witnessed extremes of human experience and remained the outsider observing life from his home in Shepperton. 1930s Shanghai, Paris of the East was a mix of international sophistication and violence, unfettered capitalism and acute poverty. American cars, martinis and Coca-Cola, a place marked by death and war. It had a profound influence on my father and his imagination. Dr Paddy's fascinating book explores my father's fiction within an international context and offers a profound reading of a man who always kept his eyes and mind open to the world. Fay Ballard. **Literature and Nature** Tawhida Akhter, Tariq Ahmad Bhat, 2022-01-27

During the last few decades there has been remarkable progress in research on various aspects of literature and nature. Different fields have been explored in this regard though there remain many fields yet to be explored. This book explores how nature plays an important role in the development of personality, looking at both its positive and negative effects. It also considers how literature has rightly portrayed the reality of a culture through its fictitious characters. The book will fulfil the needs of students, teachers, researchers and all stakeholders who are engaged in eco-feministic studies.

Utopias and Dystopias in the Fiction of H. G. Wells and William Morris Emelyne Godfrey, 2016-12-08 This book is about the fiercely contrasting visions of two of the nineteenth century's greatest utopian writers. A wide-ranging interdisciplinary study, it emphasizes that space is a key factor in utopian fiction, often a barometer of mankind's successful

relationship with nature or an indicator of danger Emerging and critically acclaimed scholars consider the legacy of two great utopian writers exploring their use of space and time in the creation of sites in which contemporary social concerns are investigated and reordered A variety of locations is featured including Morris s quasi fourteenth century London the lush and corrupted island a routed and massacred English countryside the high rises of the future and the vertiginous landscape of another Earth beyond the stars
