Louis I Kahn Houses:

The Houses of Louis Kahn George H. Marcus, William Whitaker, 2013 A stunning celebration of the architect's residential masterpieces Louis Kahn 1901-1974 one of the most important architects of the postwar period is widely admired for his great monumental works including the Kimbell Art Museum the Salk Institute and the National Assembly Complex in Bangladesh However the importance of his houses has been largely overlooked This beautiful book is the first to look at Kahn's nine major private houses Beginning with his earliest encounters with Modernism in the late 1920s and continuing through his iconic work of the 1960s and 1970s the authors trace the evolution of the architect's thinking which began and matured through his design of houses and their interiors a process inspired by his interactions with clients and his admiration for vernacular building traditions Richly illustrated with new and period photographs and original drawings as well as previously unpublished materials from personal interviews archives and Kahn's own writings The Houses of Louis Kahn shows how his ideas about domestic spaces challenged conventions much like his major public commissions and were developed into one of the most remarkable expressions of the American house *Feature: Houses by Louis I. Trajectories in Architecture Michael Jasper, 2023-04-21 Trajectories in Architecture Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories These three trajectories the plan as conceptual device a logic of sensation and temporalities serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work revealing architectural conditions and consequent spatial effects little explored to date Trajectories in Architecture adds to scholarship and expands our understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture s recent past as a contribution to identifying future possibilities In so doing the book argues for the still latent potential in modern architecture s traditions and design principles and their future expression Trajectories in Architecture includes analysis of significant projects of Le Corbusier Peter Eisenman Zaha Hadid John Hejduk Louis I Kahn and I M Pei
