to weight loss When on the keto diet you are feeding your body exactly what it needs while eliminating toxins that will slow it down The keto diet focuses on low carbohydrates which the body converts into energy to help speed up weight loss What exactly is the problem with high carbs and why should you avoid them Carbohydrates are converted into glucose and cause a spike in insulin As the insulin enters the bloodstream to process the glucose which becomes the main source of energy A spike in insulin can also result in storage of fats The body uses carbohydrates and fats as energy the former being the primary source So the more carbs you consume in your daily diet the less fat is being burned for energy Instead the spike in insulin will result in more fat storage When you consume less carbohydrates the body goes into a state referred to as ketosis Thus the name for this low carb diet Ketosis helps the body survive on less food By being in ketosis you train your body to utilize fats as the main source of energy instead of carbs simply because there is close to zero carbs to begin with During ketosis the liver breaks down fats into ketones which enables the body to use the fat as energy During a keto diet we don't starve ourselves of calories we starve the body of carbohydrates This makes weight loss easy and natural Later on you'll learn that the keto diet has many additional health benefits besides fat loss *WordPress For Dummies* Lisa

Sabin-Wilson, 2013-04-26 Provides step by step instructions on using WordPress to create and maintain blogs and Web sites

Try some breakfast recipes that you read on [Weight loss for beginners](#) Pílula Digital, 2024-01-18.

Many things make us wake up and realize that the body we live in is not the healthiest. Stress can cause us to overeat and increase cortisol, both of which don't contribute to staying fit. Being overwhelmed with balancing all aspects of life, work, kids, home, school, etc. can also make us eat less or drive to a drive-thru without thinking twice. There are multitudes of factors that can throw our healthy habits off track or simply lose them off the map completely. When we lose a small amount of weight, we reap many health benefits. Our chances of developing diseases such as diabetes and heart disease decrease. We are less likely to suffer from sleep apnea. Our blood pressure drops and we feel better about ourselves. Energy increases as we become more active and produce more hormones that make us feel good when we exercise. No matter how you do it, medical or physical, the benefits of working out and losing weight are plentiful. That said, it's time to start the journey that will end up changing your life. Are you ready?
