disputes as they have made the resources found in remote areas of the ocean and seabed more accessible. However, these resources cannot effectively be exploited at the moment as hundreds of maritime boundaries worldwide remain undelimited. The book therefore complements the legal considerations raised with substantial technical input. It also identifies key issues in maritime delimitation which have yet to be resolved and sets out the possible future direction the law may take in resolving them. It will be a unique and valuable resource for lawyers involved in cases involving maritime delimitation and scholars and students of the law of the sea.

Beach Erosion Board, 1956     Technical Memorandum , 1957     Technical Bulletin , 1928     *Broomcorn Experiments at the United States Dry-land Field Station, Woodward, Okla* John Beardsley Sieglinger, 1928     *The South China Sea Arbitration* Yoshifumi Tanaka, 2019-11-28

Beyond the scope of the dispute settlement between the Philippines and China, the South China Sea arbitral award can be thought to significantly influence the development of international law and the law of the sea. Accordingly, this book seeks to examine the South China Sea arbitration from the perspective of the development of public international law and its limitations. Specifically, it addresses the issues of jurisdiction of the Annex VII Arbitral Tribunal, the historic rights, the legal status of maritime features, the lawfulness of various activities of China, and the role of the South China Sea arbitration in the international dispute settlement. In considering these issues, this book examines the South China Sea arbitration in three respects: i) the clarification of relevant rules and obligations under the UN Convention on the Law of the Sea as well as international law; ii) the protection of community interests at sea; and iii) considerations of time elements in international law. This title is included in Bloomsbury Professional's International Arbitration online service.
