## **Lower Moments In Higher Education:**

*Lower Moments in Higher Education* Otto Frank Bauer, 1997-07-01      **Working-Class Minority Students' Routes to Higher Education** Roberta Espinoza, 2012-10-02 While stories of working class and minority students overcoming obstacles to attend and graduate from college tend to emphasize the individualistic and meritocratic aspect this book based in extensive empirical study of American high school classrooms and in theories of social and cultural capital examines the social relations that often underpin such successes highlighting the significant formal and informal academic interventions by educators and other education professionals      **Recognizing and Serving Low-Income Students in Higher Education** Adrianna Kezar, 2010-09-13 Written for administrators faculty and staff in Higher Education who are working with low income and first generation college students *Recognizing and Serving Low Income Students in Higher Education* uncovers organizational biases that prevent post secondary institutions from adequately serving these students This volume offers practical guidance for adopting new or revised policies and practices that have the potential to help these students thrive This contributed volume is based on empirical studies that specifically examine the policies and practices of postsecondary institutions in the United States England and Canada The contributing authors argue that discussions of diversity will be enriched by a better understanding of how institutional policies and practices affect low income students Unlike most studies on this topic this volume focuses on institutional rather than federal state and public policy Institutional policies and practices have been largely ignored and this volume lifts the veil on processes that have remained hidden      Students, Staff and Academic Mobility in Higher Education Mike Byram, 2009-03-26 Academic mobility in higher education is an old phenomenon but it has become a high profile issue as the numbers of students and staff engaged and the number of countries involved has increased hugely in the last few decades For this reason and many others political cultural and educational this book reports research on the many facets of the experience and people involved both now and in the past The emphasis in research has so far tended to focus on contemporary student mobility but this collection deliberately includes articles on mobile staff because the question of mobility is a matter for universities and higher education in its entirety and not just a matter of bringing new students into existing and unchanging lectures laboratories and seminars Despite the fact that universities are and have been international institutions in their composition from the beginning universities became in the 19th and 20th century de facto national institutions This has changed and continues to change in the 21st century for many reasons but often financial as universities seek to enhance their budgets in a globalised economy and students seek to enhance their employment chances by acquiring qualifications with a difference However even if the starting point is financial nonetheless the chapters in this book demonstrate that the effects of mobility are much more far reaching The effects are on host universities on the university community of staff and students on the ways in which staff and students understand the nature of university study on the ways students may or may not integrate with a local community By

experiencing something different for institutions an influx of students with different ideas about academic study for students an interaction with locals and with other internationals for staff a challenge to their assumptions about teaching and learning all see themselves in a new light and are often forced to change This book charts the changes which are happening now and will undoubtedly continue for the foreseeable future It therefore offers all involved a reflection on their own experience and practice and the means of improving them

**Reflective Teaching in Higher Education** Paul Ashwin, David Boud, Susanna Calkins, Kelly Coate, Fiona Hallett, Gregory Light, Kathy Lockett, Iain MacLaren, Katarina Mårtensson, Jan McArthur, Velda McCune, Monica McLean, Michelle Tooher, 2020-02-20 Reflective Teaching in Higher Education is the definitive textbook for those wanting to excel at teaching in the sector Informed by the latest research in this area the book offers extensive support for those at the start of an academic career and career long professionalism for those teaching in higher education Written by an international collaborative author team of experts led by Paul Ashwin Reflective Teaching in Higher Education offers two levels of support practical guidance for day to day teaching covering key issues such as strategies for improving learning teaching and assessment curriculum design relationships communication and inclusion evidence informed principles to aid understanding of how theories can effectively inform teaching practices offering ways to develop a deeper understanding of teaching and learning in higher education In addition to new case studies from a wider variety of countries than ever before this new edition includes discussion of What is meant by agency Gender ethnicity disability and university teaching Digital learning spaces and social media Teaching career development for academics Decolonising the curriculum Assessment and feedback practices Teaching excellence and learning gain 2015 UN General Assembly 2030 Agenda for Sustainable Development reflectiveteaching.co.uk provides a treasure trove of additional support It includes supplementary sector specific material to support for considering questions around society's educational aims and much more besides

**A History of American Higher Education** John R. Thelin, 2019-04-02 The definitive history of American higher education now up to date Colleges and universities are among the most cherished and controversial institutions in the United States In this updated edition of A History of American Higher Education John R Thelin offers welcome perspective on the triumphs and crises of this highly influential sector in American life Exploring American higher education from its founding in the seventeenth century to its struggle to innovate and adapt in the first decades of the twenty first century Thelin demonstrates that the experience of going to college has been central to American life for generations of students and their families Drawing from archival research along with the pioneering scholarship of leading historians Thelin raises profound questions about what colleges are and what they should be Covering issues of social class race gender and ethnicity in each era and chapter this new edition showcases a fresh concluding chapter that focuses on both the opportunities and problems American higher education has faced since 2010 The essay on sources has been revised to incorporate books and articles published over the past decade The book also updates the discussion of perennial hot button issues such as big time sports programs

online learning the debt crisis the adjunct crisis and the return of the culture wars and addresses current areas of contention including the changing role of governing boards and the financial challenges posed by the economic downturn Anyone studying the history of this institution in America must read Thelin's classic text which has distinguished itself as the most wide ranging and engaging account of the origins and evolution of America's institutions of higher learning *Campus Sexual Assault* Evan Gerstmann, 2019 Demonstrates how colleges routinely deny students fair hearings in sexual assault cases and define sexual assault in an unconstitutionally broad manner *The Working Classes and Higher Education* Amy E. Stich, Carrie Freie, 2015-12-22 Within the broader context of the global knowledge economy wherein the college for all discourse grows more and more pervasive and systems of higher education become increasingly stratified by social class important and timely questions emerge regarding the future social location and mobility of the working classes Though the working classes look very different from the working classes of previous generations the weight of a universal working class identity background amounts to much of the same economic vulnerability and negative cultural stereotypes all of which continue to present obstacles for new generations of working class youth many of whom pursue higher education as a necessity rather than a choice Using a sociological lens contributors examine the complicated relationship between the working classes and higher education through students' distinct experiences challenges and triumphs during three moments on a transitional continuum the transition from secondary to higher education experiences within higher education and the transition from higher education to the workforce In doing so this volume challenges the popular notion of higher education as a means to equality of opportunity and social mobility for working class students **Transitions in Vocational Education** Jürgen Seifried, Eveline Wuttke, 2013-10-02 This volume focuses on the different passages and transitions in Vocational Education and professional work life Exploring the personal experiences of coping with the transition from school to vocational education vocational education to work and finally within work life the book takes account of the rapidly changing conditions under which these processes take place *Exploring Consensual Leadership in Higher Education* Lynne Gornall, Brychan Thomas, Lucy Sweetman, 2018-07-26 Exploring Consensual Leadership in Higher Education explores the idea that the nature of academic work is both creative and consensual Higher education relationships whether between managers staff learners or the public sphere are at their most effective when rooted in partnership teamwork collaboration and collegiality The term consensual is used because it situates new leadership models as structures based on consent reflecting tacit traditions in education alongside ideas of leadership in other settings including emerging industries The aim is to celebrate achievements encourage engagement opportunities and add to the problem solving knowledge base However issues and problems in participatory engagement are also considered and the borderlines between consensus collective assent and agreement and dissensus widespread serious disagreement are examined critically The contributors offer a range of alternative perspectives on leadership reflecting the diverse forms and ways of working practised in different national

higher educational contexts and cultural settings The volume incorporates a variety of approaches and points of view including stories of leadership and change innovation projects and case studies key interviews and insights and collective team writing

**International Handbook of Teacher Education** John Loughran, Mary Lynn Hamilton, 2016-05-04 The International Handbooks of Teacher Education cover major issues in the field through chapters that offer detailed literature reviews designed to help readers to understand the history issues and research developments across those topics most relevant to the field of teacher education from an international perspective This volume is divided into two sections The organisation and structure of teacher education and knowledge and practice of teacher education The first section explores the complexities of teacher education including the critical components of preparing teachers for teaching and various aspects of teaching and teacher education that create tensions and strains The second examines the knowledge and practice of teacher education including the critical components of teachers professional knowledge the pedagogy of teacher education and their interrelationships and delves into what we know and why it matters in teacher education
