Lubricated Wear:

Lubricated Wear A. Sethuramiah, 2003-06-20 As a result of the increased focus on modern compact machinery in industry wear in lubricated contacts and the problems of running in and scuffing has become the most important form of wear Despite this trend until now information on lubricated wear has been scattered across a wide number of journals emphasizing only one aspect of the wear process This new book is a unique resource consolidating all the available information into one place In doing this Sethuramiah contributes significantly to the development of knowledge in the field by highlighting knowledge gaps for future research More immediate improvements in practice have been clearly identified with well argued methodologies with which the present level of knowledge can be improved This book will therefore prove an essential resource for all engineers and scientists with an interest in lubricated wear Lubricated Wear A. Sethuramiah, 2003

Dorinson, K.C. Ludema, 1985-08-01 Although it is widely recognized that friction wear and lubrication are linked together in a single interdisciplinary complex of scientific learning and technological practice fragmented and specialized approaches still predominate In this book the authors examine lubrication from an interdisciplinary viewpoint They demonstrate that once the treatment of lubrication is released from the confines of the fluid film concept this interdisciplinary approach comes into full play Tribological behavior in relation to lubrication is then examined from two major points of view one is mechanical not only with respect to the properties and behavior of the lubricant but also of the surfaces being lubricated The other is chemical and encompasses the chemistry of the lubricant the surfaces and the ambient surroundings It is in the emphasis on the interaction of the basic mechanical and chemical processes in lubrication that this book differs from conventional treatments Lubricated Wear A.
