P. MacKenzie, 2017-08-04 During World War II Allied casualty rates in the air were high Of the roughly 125 000 who served as aircrew with Bomber Command 59 423 were killed or missing and presumed killed a fatality rate of 45 5% With odds like that it would be no surprise if there were as few atheists in cockpits as there were in foxholes and indeed many airmen faced their dangerous missions with beliefs and rituals ranging from the traditional to the outlandish Military historian S P MacKenzie considers this phenomenon in *Flying against Fate* a pioneering study of the important role that superstition played in combat flier morale among the Allies in World War II

Mining a wealth of documents as well as a trove of published and unpublished memoirs and diaries MacKenzie examines the myriad forms combat fliers superstitions assumed from jinxes to premonitions Most commonly airmen carried amulets or talismans lucky boots or a stuffed toy a coin whose year numbers added up to thirteen counterintuitively a boomerang Some performed rituals or avoided other acts e g having a photo taken before a flight Whatever seemed to work was worth sticking with and a heightened risk often meant an upsurge in superstitious thought and behavior MacKenzie delves into behavior analysis studies to help explain the psychology behind much of the behavior he documents not slighting the large cohort of crew members and commanders who demurred He also looks into the ways in which superstitious behavior was tolerated or even encouraged by those in command who saw it as a means of buttressing morale The first in depth exploration of just how varied and deeply felt superstitious beliefs were to tens of thousands of combat fliers Flying against Fate expands our understanding of a major aspect of the psychology of war in the air and of World War II Masters of the Air MTI Donald L. Mestres do ar
 Donald L. Miller, 2024-01-29. Em Mestres do ar, Donald L. Miller conta a instigante saga da Oitava Frota Aérea do Exército americano na Segunda Guerra Mundial e dos jovens que voaram nos bombardeiros que ajudaram a levar a Alemanha nazista à derrota. A Segunda Guerra Mundial não poderia ter sido vencida sem os bombardeiros da Oitava Frota Aérea dos Estados Unidos da América. Em Mestres do ar, o premiado historiador Donald Miller conta a dramática história dos bombardeiros Clark Gable e Jimmy Stewart entre eles que levaram a guerra ao território de Hitler antes que os soldados Aliados pisassem em solo alemão. A Oitava Frota Aérea começou uma campanha limitada de bombardeios em meados de 1942. As perdas foram terríveis e a situação piorou ainda mais, até que um novo tipo de avião de combate chegou para escoltar os bombardeiros em suas missões. Por fim, o bombardeamento teve sucesso, destruindo entroncamentos ferroviários e refinarias de petróleo e paralisando o esforço de guerra alemão, enquanto as escoltas de caças dizimavam a Luftwaffe. Mas o preço do sucesso foi alto: a Oitava perdeu mais homens na guerra do que o
