Perv Jesse Bering,2013-10-08 As a sex writer Jesse Bering is fearless and peerless Dan Savage You are a sexual deviant A pervert

through and through We may not want to admit it but as the award winning columnist and psychologist Jesse Bering reveals in *Perv* there is a spectrum of perversion along which we all sit Whether it s voyeurism exhibitionism or your run of the mill foot fetish we all possess a suite of sexual tastes as unique as our fingerprints and as secret as the rest of the skeletons we ve hidden in our closets Combining cutting edge studies and critiques of landmark research and conclusions drawn by Sigmund Freud Alfred Kinsey and the DSM 5 Bering pulls the curtain back on paraphilias arguing that sexual deviance is commonplace He explores the countless fetishists of the world including people who wear a respectable suit during the day and handcuff a willing sexual partner at night But he also takes us into the lives of erotic outliers such as a woman who falls madly in love with the Eiffel Tower a pair of deeply affectionate identical twins those with a particular penchant for statues and others who are enamored of crevices not found on the human body Moving from science to politics psychology history and his own reflections on growing up gay in America Bering confronts hypocrisy prejudice and harm as they relate to sexuality on a global scale Humanizing so called deviants while at the same time asking serious questions about the differences between thought and action he presents us with a challenge to understand that our best hope of solving some of the most troubling problems of our age hinges entirely on the amoral study of sex As kinky as it is compassionate illuminating and engrossing *Perv* is an irresistible and deeply personal book I can t promise you an orgasm at the end of our adventure Bering writes but I can promise you a better understanding of why you get the ones you do

A Foot in the River Felipe Fernández-Armesto, 2015 We are a weird species Like other species we have a culture But by comparison with other species we are strangely unstable human cultures self transform diverge and multiply with bewildering speed They vary radically and rapidly from time to time and place to place And the way we live our manners morals habits experiences relationships technology values seems to be changing at an ever accelerating pace The effects can be dislocating baffling sometimes terrifying Why is this In *A Foot in the River* best selling historian Felipe Fernandez Armesto sifts through the evidence and offers some radical answers to these very big questions about the human species and its history and speculates on what these answers might mean for our future Combining insights from a huge range of disciplines including history biology anthropology archaeology philosophy sociology ethology zoology primatology psychology linguistics the cognitive sciences and even business studies he argues that culture is exempt from evolution Ultimately no environmental conditions no genetic legacy no predictable patterns no scientific laws determine our behaviour We can consequently make and remake our world in the freedom of unconstrained imaginations A revolutionary book which challenges scientistic assumptions about culture and how and why cultural change happens *A Foot in the River* comes to conclusions which readers may well find by turns both daunting and also potentially hugely liberating

relics of childhood that come to us from the archaeological record and the bones and teeth of our ancestors science has started to unravel the evolution of our childhood right down the fossil record In our species investment doesn't stop at birth and as Growing Up Human reveals we can compare every aspect of our care and feeding from the chemical composition of our milk to our fondness for formal education from ancient times onwards in order to understand just what we evolved our weird and wonderful childhoods for
