## **National And International Law Enforcement In The Ocean:**

National and International Law Enforcement in the Ocean William T. Burke, 1975      **Canadian Foreign Policy and the Law of Sea** Barbara Johnson, Mark W. Zacher, 2011-11-01 Since the 1960s there have been intensive international negotiations to revise the law of the sea. These discussions culminated in the convening of the Third United Nations Conference on the Law of the Sea in December 1973 and in four additional sessions up to September 1976. Whether the almost 150 participating states will be able to reach an accord in 1977 or later on the myriad issues on their agenda is still uncertain. Two major issues have been the extension of coastal state jurisdiction over resources and activities and the establishment of an international regime to govern the exploitation of the deep seabed. Canada's most significant role has been that of a leader of the coastal state grouping which has sought to expand states' jurisdiction over fisheries, seabed resources, scientific research and pollution control within a 200 mile economic zone and sometimes beyond. A number of these Canadian policy goals have already been accepted by a large majority of the participants in the conference. In this role, Canada has found itself opposed to many of its traditional allies among the developed nations with large fleets engaged in commerce in distant waters and concerned about the traditional freedom of the high seas and has aligned itself with the coastal developing nations of Africa, Asia and Latin America. The seven essays in this volume examine the development of Canadian policies on the major law of the sea issues and the outcome of the negotiations on them. In so doing, the studies have analysed Canada's dramatic seaward expansion and involvement in one of the most important United Nations Conferences.      *Federal Ocean Program* United States. **Integrated Maritime Security** Dr. Prabhakaran Paleri, 2014-05-01 This book is unique in the way that it looks at the much talked about maritime security through the perspective of national security without disconnect in the terrain specific mode of the ocean. The uniqueness is not in the treatment of the concept of maritime security but that of national security in a manner that is different from the beaten notion of physical security of a nation and its people from external and internal threats. National security according to the author is more than just military security or the conditions of what is often termed as internal security. It is complex according to his studied findings. The book provides a warning to governments that any approach to national governance without integrated maritime security can be defeating in the overall objective of maximising national security even for landlocked countries in the modern world. The book provides a comprehensive review and analysis of integrated maritime security providing ample scope for further research on many of the concepts and terminologies inculcated as findings of research. The interesting aspect is that the author views maritime security as a ghost protocol to hammer his ideas into the earnest listener.      **Human Rights and Law Enforcement at Sea** Anna Petrig, 2014-10-30 Law enforcement at sea has become an increasingly important tool for combating transnational crime. Such law enforcement

operations are commonly directed by multinational missions composed of military rather than police forces and are often carried out in maritime areas not subject to national jurisdiction. Because of these characteristics maritime law enforcement operations touch upon many unresolved human rights issues. In the present study counter piracy operations off the coast of Somalia and in the Indian Ocean serve as the quintessential example of how law enforcement measures taken at sea may fall short of international human rights standards. An unprecedented number of national and multinational missions have been deployed to counter the phenomenon of piracy off the coast of Somalia and in the region. Their mandate includes the arrest, detention and transfer for prosecution of piracy suspects. The book at hand examines the procedures pertinent to the decision whether to release piracy suspects, prosecute them in the seizing State or transfer them to a third State and the detention regime pending such decisions. The study provides a critical analysis of the compatibility of these procedures with international law, first and foremost human rights law. Using piracy as an example, it demonstrates that the characteristics of national and multinational law enforcement at sea may lead to a deviation from certain human rights standards that the States in question readily accept and apply in their land based territorial law enforcement operations. At the centre of the analysis are two unique case studies which provide insight into the arrest, detention and transfer procedures in both a multinational context and a purely interstate setting. This work is a valuable contribution to legal scholarship dealing with the human rights dimension of maritime law enforcement operations. It is a useful, timely and innovative resource for both academics and legal practitioners alike or any person interested in the applicability and scope of human rights norms in the maritime context.

**Ocean Law and Policy** Carlos Espósito, James Kraska, Harry N. Scheiber, Moon-Sang Kwon, 2016-10-11

In the years since 1994 when the UN Convention on the Law of the Sea (UNCLOS) entered into force, the ocean law regime has been profoundly affected by an interplay of new forces in global ocean affairs. Numbered among them are innovations in technology and science, the emergence of intensified piracy and other challenges to maritime security, national and regional programs. In *Ocean Law and Policy: Twenty Years of Development under the UNCLOS Regime*, experts from fourteen countries present nineteen papers that provide insightful analyses of these wide ranging issues that form the emerging new context of UNCLOS as a keystone to a working regime system. Accessible as well as authoritative, this volume offers to general readers as well as academics, policy officials and legal experts a set of important analyses and provocative insights forming a major contribution to the literature of ocean studies.

**Encyclopedia of Ocean Law and Policy in Asia-Pacific** Seokwoo Lee, 2022-11-21

This timely encyclopedia addresses the underrepresented scholarly state practice of the Asia Pacific region in negotiating and implementing the United Nations Convention on the Law of the Sea (UNCLOS), a continuing cornerstone of focus for regional and non regional states alike. Further highlights for each represented state include ocean treaty accessions, domestic implementation, maritime zones, maritime disputes, exploring and exploiting living and non living resources, marine environment protection, marine scientific research, dispute settlement and contributions to the development.
