National Curriculum For The Early Years:

The National Curriculum and the Early Years Theodore Cox,1996 The child centred principles of early years education are being challenged by the implementation of a subject based National Curriculum This book explores this challenge and offers some ways of meeting it practically and productively **EBOOK: National Curriculum for the Early Years** Angela Anning,1995-10-16 What does the National Curriculum mean to pupils and teachers at Key Stage One How have teachers and children coped with the ongoing changes How has subject teaching altered in infant classrooms In A National Curriculum for the Early Years Angela Anning and her team of contributors set out to examine these issues Infant teachers and their pupils were the guinea pigs for the introduction of the National Curriculum over a five year period Despite many reservations about a subject based curriculum for young children teachers struggled to interpret the National Curriculum Orders into a workable if not manageable curriculum in their classrooms The contributors to this book each experts in a subject discipline have kept in close touch with practising and intending infant teachers as the National Curriculum was operationalized in primary schools They have used their teacher networks as well as research evidence to tap into the strategies used by infant teachers to cope with the planning delivery and assessment of the National Curriculum subjects and the effects of government policy changes on young children s learning Together the contributors provide a timely analysis of subject discipline based education for young children and look ahead to the prospects for those subjects at Key Stage One in the second half of the 1990s This book will be essential reading for anyone involved in the education of young children **Early Childhood Education** Early Years Curriculum Group,1989 International Handbook of Early Childhood Education Marilyn Flear,Bert van Oers,2017-10-10 This international handbook gives a comprehensive overview of findings from longstanding and contemporary research theory and practices in early childhood education in the Northern and Southern hemispheres The first volume of the handbook addresses theory methodology and the research activities and research needs of particular regions The second volume examines in detail innovations and longstanding programs curriculum and assessment and conceptions and research into child family and communities The two volumes of this handbook address the current theory methodologies and research needs of specific countries and provide insight into existing global similarities in early childhood practices By paying special attention to what is happening in the larger world contexts the volumes provide a representative overview of early childhood education practices and research and redress the current North South imbalance of published work on the subject *National Curriculum* Great Britain. Parliament. House of Commons. Children, Schools and Families Committee,Great Britain: Parliament: House of Commons: Children, Schools and Families Committee,2009 The Committee for Children Schools and Families recommends major changes to the nature and management of the national curriculum In its current form the national curriculum essentially accounts for all the available teaching time and the Committee would like to see a cap placed so that less than half that time is prescribed centrally A

slimmed down national curriculum designed much more from the learner's perspective setting out the learning that they have a right to access is recommended. Parents should be provided with a copy of the national curriculum so that they can take on a greater role in overseeing the curriculum that their child experiences. The Committee is not convinced by the proposed Programmes of Study for the primary curriculum put forward in the interim report of the Rose Review available at <http://publications.teachernet.gov.uk> which seem unnecessarily complex. It takes a similar view on the new secondary curriculum and is concerned at some of the Early Learning Goals specified in the Early Years Foundation Stage: there should be more emphasis at this stage on developing speaking, listening and social skills. All schools should have the freedoms in curriculum matters enjoyed by Academies and should not be pressured to follow the non-statutory National Strategies guidance. The report also stresses the importance of empowering professional teachers rather than the current approach of prescription and direction. The coherence and continuity in the curriculum is another concern with a history of piecemeal creation and amendment to frameworks from 0 to 19. The Committee recommends an independent curriculum authority be established to review and then keep the curriculum refreshed.

A Guide to Early Years and Primary Teaching Dominic Wyse, Sue Rogers, 2016-04-20. How do people become effective teachers? This is the textbook students need to support them on this journey, no matter their training route or whether primary or early years is in focus. Through a unique pairing of academic research and teaching expertise, each chapter is collaboratively authored by an academic specialist and an experienced practitioner to provide a realistic and practical view of teaching children from years 3-11. The book combines all the major topics, theories and research students need to know along with up-to-date policy and legislation. Inventive and practical learning aids and carefully crafted online resources will help readers to understand helpful learning aims at the beginning and summaries at the end of every chapter guide students through each topic. Apply Spotlight on Practice features highlight real teaching examples. Putting it into Practice features provide advice on how key concepts can be employed in real life whilst classroom activities on the website provide further ideas for teaching. Reflect on key concepts as well as your own practice and values through the reflection points and author podcasts on the website outlining key issues to stimulate critical thinking. Go further with informative annotated further reading at the end of every chapter. Links to relevant websites integrated throughout and carefully selected SAGE journal articles freely available on the website. This is an essential textbook for use across all your primary and early years teaching courses whether students are training to be lower/upper primary school teachers or early years practitioners including those on undergraduate or postgraduate teacher training courses and employment-based routes.
