Es necesario caracterizar lo que entendemos por competencias científicas y conceptos que pueden ser útiles para desarrollarlas como indagación, argumentación, uso de pruebas o prácticas científicas. Esta publicación comprende un conjunto de propuestas de profesorado de educación secundaria y universidad con el objetivo de ayudar a aproximarnos a la indagación en el aula y desde la práctica valorar de qué modo diferentes estrategias educativas favorecen el desarrollo de las competencias científicas. Se dirige principalmente a profesorado de ciencias de secundaria aunque también puede ser útil para docentes de otros niveles. Combinando una aproximación teórica a la argumentación, la indagación y las prácticas científicas con propuestas experimentadas para el aula pretende aportar ideas y recursos que los profesores y profesoras puedan llevar a sus clases.

**Saints of Feather and Fang** Caryn Rivadeneira, 2022-04-19 From sheepdogs to wombats to coyotes to jellyfish animals serve important biological roles in the world. But those who love animals know there's more. We know our connection to other creatures is more than fur, scale or feather deep. In *Saints of Feather and Fang* writer and lifelong animal lover Caryn Rivadeneira looks at the ways that animals from the pets who share our homes to the mysterious creatures of the deep serve as spiritual guides for our hearts, minds and souls. Christian scripture teems with mammals, birds and reptiles and research on animals' sensory responses suggests that we not only care for our beloved animals but they at times care for us. A therapy pony who visits stroke victims, a rescued pit bull who shows restraint, hedgehogs that scurry down highways made just for them, these stories offer entrance to tender, whimsical and deeply theological reflection on creaturely delight, instinct, curiosity, adaptation, fear and awe. In them we discover and connect with the God who beckons, rescues and shelters us with stretched out wings.

**The Man Who Predicts Earthquakes** Cal Orey, 2006 Meet Jim Berkland, a California geologist whose forecast of the famous October 17, 1989 World Series Quake that rumbled through the San Francisco Bay Area was right on the money. This is the first book to document a geologist's uncanny ability to foretell earthquakes around the world. This fascinating read includes stories of earthquake survivors, a wealth of details about seismic activity in earthquake-prone regions around the world.

Actas del XV Simposio sobre Enseñanza de la Geología Amelia Calonge, 2008 Science and the Power of TV Jaap Willems, Winfried Göpfert, 2006 Has the advent of internet diminished the role television plays in science communication? Some might think so, but we don't. We are convinced that television still plays an important role in keeping the general public informed of developments from the world of science and technology and its influences on society. Television might still even be the most important channel, given that in Europe and the US almost everybody watches it much more so than surfing the internet regularly or reading newspapers and magazines. Still, television programmes on science are hard to

find It is a fact that academics and public affairs officers do not always appreciate the power of this medium By showing the possibilities television has to offer this book intends to change this attitude Besides documentaries other formats are equally suited to help popularise science and technology related subjects news items soaps docudrama s talk shows and quizzes
