**Landscape Approach** Jessica Brown, Nora J. Mitchell, Michael Beresford, 2005 The traditional patterns of land use that have created many of the world's cultural landscapes contribute to biodiversity support ecological processes provide important environmental services and have proven sustainable over the centuries Protected landscapes can serve as living models of sustainable use of land and resources and offer important lessons for sustainable development Examples of these landscapes and the diverse strategies needed to maintain this essential relationship between people and the land are provided

**Moorlands of England and Wales** Ian G Simmons, 2019-08-07 The huge expanse of the moor The millennia of the hunter gatherers The millennia of an agriculturalist economy Into an industrial economy Vegetation management and nature conservation More detailed histories Representations from the imaginations Too far for you to see      **Green-line Parks: an Approach to Preserving Recreational Landscapes in Urban Areas** United States. Congress. Senate. Interior and Insular Affairs Committee, 1975      Tourism and National Parks Warwick Frost, C. Michael Hall, 2012-08-21 In 1872 Yellowstone was established as a National Park The name caught the public's imagination and by the close of the century other National Parks had been declared not only in the USA but also in Australia Canada and New Zealand Yet as it has spread the concept has evolved and diversified In the absence of any international controlling body individual countries have been free to adapt the concept for their own physical social and economic environments Some have established national parks to protect scenery others to protect ecosystems or wildlife Tourism has also been a fundamental component of the national parks concept from the beginning and predates ecological justifications for national park establishment though it has been closely related to landscape conservation rationales at the outset Approaches to tourism and visitor management have varied Some have stripped their parks of signs of human settlement while increasingly others are blending natural and cultural heritage and reflecting national identities This edited volume explores in detail the origins and multiple meanings of National Parks and their relationship to tourism in a variety of national contexts It consists of a series of introductory overview chapters followed by case study chapters from around the world including insights from the US Canada Australia UK Spain France Sweden Indonesia China and Southern Africa Taking a global comparative approach this book examines how and why national parks have spread and evolved how they have been fashioned and used and the integral role of tourism within national parks The volume's focus on the long standing connection between tourism and national parks and the changing concept of national parks over time and space give the book a distinct niche in the national parks and tourism literature The volume is expected to contribute not only to tourism and national park studies at the upper level undergraduate and graduate levels but also to courses in international and comparative environmental history conservation studies and outdoor recreation management

Ecology J. L. Chapman, M. J. Reiss, 1998-12-10 Ecology Principles and Applications is a comprehensive textbook for A level students and first year undergraduates taking courses in biology geography and Earth sciences who require an introduction to ecology Studies of human ecology are integrated into the text and the links to related disciplines are emphasised The text begins with the ecology of individual organisms and moves on through communities and ecosystems to global considerations of biogeography co evolution and conservation Case histories historical perspectives controversial theories and extension material are highlighted throughout the book The second edition has been brought up to date with current syllabuses by the addition of further material on the key issue of conservation giving excellent coverage of the principles of conservation and using case studies to provide examples of conservation policies in practice The authors are experienced teachers of ecology at sixth form and undergraduate level
